Profile

Computer Science & Engineering (AI) undergraduate at **Bennett University**, bridging the gap between complex Artificial Intelligence and user-friendly software. Currently focused on building **Enterprise RAG Systems** and **Agentic Workflows**, with a deep interest in Multi-Modal Models and Distributed Systems.

Education

Bennett University — Greater Noida, UP
B.Tech in Computer Science & Engineering (Specialization in AI) — *Aug. 2023 – Present*

Cambridge School — Indirapuram
Higher Secondary Education (12th Boards) — *Completed: Mar. 2023*

Technical Skills

Languages & Core: Python, C++, JavaScript, SQL (MySQL, PostgreSQL), Git
AI & Data: LangChain, OpenAI API, Google Gemini, PyTorch, TensorFlow, Scikit-Learn, OpenCV, BigQuery, Power BI
Web & Design: React.js, HTML5, CSS3, Tailwind CSS, Figma
Cloud & Platforms: Google Cloud Platform (GCP), AWS (Basic), Docker

Experience

Software Development Intern — Jun. 2025 – Aug. 2025
Dalmia Bharat Group — *Remote/On-site*

- Built **AI Agents** using **LangChain** and **OpenAI** for automated data analysis and insight generation.
- Engineered robust data pipelines connecting **MySQL** to **Google BigQuery** for scalable storage.
- Optimized NFA approval workflows using **React** and **Python**, enhancing system efficiency and user experience.

Frontend Design Intern — Jun. 2025 – Sept. 2025
Raahi — *Remote*

- Spearheading UI/UX design for a student-centric carpooling platform using **Figma**.
- Designing intuitive layouts and optimizing user journeys to promote sustainable campus transportation.

Co-Head, Multimedia & Design — Sep. 2024 – Jun. 2025
Alan Turing Club — *Bennett University*

- Led content strategy and visual design for technical events; managed UI/UX for coding events and media coverage.

Projects

Enterprise Data Intelligence Platform (EDIP) | *LangChain, Gemini, RAG, ChromaDB*

- Developed a conversational BI solution unifying SQL, CSV, and Document analysis using **LLM**.
- Implemented **RAG (Retrieval-Augmented Generation)** for querying unstructured data stored in **ChromaDB**.
- Engineered automated statistical driver analysis to generate executive-ready insights.

Few-Shot Satellite Image Segmentation | *PyTorch, ViT, MAE*

- Co-authored a research framework utilizing **Multi-View Masked Autoencoders (MVMAE)** for robust feature learning.
- Implemented a **ViT-based U-Net** and validated performance on the **ISPRS Potsdam dataset**.

Blender Meshy.ai 3D Generator | *Python, Blender API, Meshy.ai REST API, Base64 Streaming*

- Developed a production-ready Blender addon generating 30k+ poly quad-topology 3D models from text prompts using **Meshy.ai's API**.
- Implemented robust **async polling** and chunked GLB downloads (8KB streams) to ensure seamless integration and auto-importing.
- Engineered batch processing for concept art with hybrid text+image modes, error handling, and configurable poly counts.

Certifications

Specializations: Neural Networks and Deep Learning, Object-Oriented Programming in C++
Others: Relational Database Design, Project Planning & Management
