Education

B.Tech in Computer Science Engineering

Bennett University, Greater Noida, Uttar Pradesh — CGPA: 8.2

2022 – 2026

Work Experience

Software Development Intern — Multiplexer Solution Pvt. Ltd.

(2025 – Present)

- Developing backend and frontend features using Python (FastAPI), React.js, and PostgreSQL for a platform serving **500+ users**.
- Built and deployed REST APIs with AWS integration and Docker-based containerization, reducing deployment time by **30%**.
- Collaborating in a team of 6 using GitHub CI/CD workflows to maintain scalable and production-ready code.

Machine Learning Intern — Cognizant (IIT Roorkee)

(2024)

- Improved classification model accuracy by **12%** through feature engineering and hyperparameter tuning.
- Reduced model retraining time by **25%** using cross-validation and automated experiments.

Projects

Dois Bros Web Application

🌐 Live Demo

Tech Stack: React.js, Node.js, Express.js, MongoDB, Stripe Payment Gateway, REST APIs

- Built a food ordering platform with menu browsing, order placement, and live order tracking.
- Developed an admin dashboard to manage menus and orders in real time, reducing manual coordination by **40%**.

StayFinder

🌐 Live Demo

Tech Stack: React.js, TailwindCSS, Node.js, Express.js, MongoDB, Cloudinary

- Built a full-stack Airbnb-style property booking platform with search and reservation features, deployed on Vercel with **50+ listings**.
- Developed a responsive frontend using React, TailwindCSS, React Router, and Axios, improving mobile retention by **35%**.
- Designed RESTful APIs with Express.js and MongoDB Atlas, supporting **20+** successful test bookings.
- Integrated Cloudinary for image uploads and secured routes using JWT-based authentication.

Research Work

Sign Language Recognition using Deep Learning — with Dr. Pooja

(2025)

- Improved recognition accuracy by **15%** on **5,000+** video frames using deep learning models.
- Proposed OpenCV-based enhancements for real-time gesture recognition.

Dataset of RADARSAT-1 Standard Beam SAR Images — with Dr. Vikas Jain

(2024)

- Applied deep learning-based despeckling on **10,000+** SAR images, improving image clarity by **18%**.
- Demonstrated applications in remote sensing and Earth observation tasks.

Technical Skills

Programming: C++, Python, Java

Web Development: HTML, CSS, JavaScript, React.js, Node.js, MySQL

Machine Learning & AI: NumPy, pandas, scikit-learn, Keras, OpenCV, NLP

Tools / Platforms: Git/GitHub, VS Code, Jupyter, Google Colab, Linux

Databases / Other: MongoDB, PostgreSQL, Stripe Payment Gateway

Core CS Concepts: OOP, DBMS, Operating Systems, Data Structures & Algorithms

Certifications

AWS Builders Online Series — AWS

Solutions Architecture Job Simulation - AWS

Data Science for Engineers (ELITE) — NPTEL (IIT Madras)

Cybersecurity Analyst Job Simulation — Tata (Forage)

GenAI Powered Data Analytics — Accenture (Forage)

Data Visualization: Business Insights — Tata (Forage)

Exploratory Data Analysis for ML — Coursera (IBM)
