

KHUSHWANT MALI

☎ 63673 26706 ✉ khushwantmalisawar11@gmail.com [in LinkedIn](#) [GitHub](#)

Education

Bennett University

Bachelor of Technology, Computer Science

August 2023 – 2027

CGPA-7.73

Technical Skills

Programming: Data Structures, Algorithms, C++, Java, Python

Frontend: JavaScript, React, Nextjs, Tailwind, Bootstrap, HTML, CSS

Backend: Node JS, Express JS

DataBase: Mongo DB, Postgresql, SQL

CourseWork: Operating System, Computer Networks, DBMS, OOPs, Artificial Intelligence, Machine Learning

Achievements

Completed **700+** **Data Structure and Algorithm problems** on LeetCode, GeeksForGeeks, Codechef and Codeforces, sharpening my **problem-solving skills** and **logical reasoning**.

Achieved **Rank 38 out of 400+** teams in our university-level **Smart India Hackathon** and **Rank 1** in our problem statement. Worked on a **Machine-Learning** model to help with agricultural decisions by analysing the soil health, crop type, weather pattern etc.

Awarded **Google certification** on Cloud Computing Foundations, Generative AI, Prompt Engineering, and Performing Foundational Tasks, demonstrating expertise in **cloud infrastructure, networking, AI/ML, and secure network management**.

Profile Links

LeetCode Regularly solve DSA problems on LeetCode, focusing on problem-solving skills and algorithmic efficiency.

GeeksForGeeks GeeksforGeeks to improve logic building and enhance problem-solving techniques.

CodeChef Engaging in competitive programming contests and improving algorithmic proficiency.

Codeforces Actively participating in Codeforces contests to strengthen algorithmic problem-solving skills.

Projects

Sorting Algorithm Visualizer | [GitHub](#)

[Web Link](#)

- Responsive visual representation of various sorting algorithms like Bubble, Selection, Merge, Comb, Counting sort etc. Built mainly using **Bootstrap, jQuery, JavaScript, HTML and CSS**.

Massimo Food Delivery App | [GitHub](#)

[Web Link](#)

- Developed a feature-rich food delivery platform for browsing restaurants, exploring menus, and placing secure online orders.
- Implemented real-time availability updates, smooth UI/UX, and optimized performance for high user traffic.
- Built using JavaScript, HTML, CSS, React, Next.js, and TypeScript.

Obyes Agency Website Frontend Project | [GitHub](#)

[Web Link](#)

- Responsive visual representation of various sorting algorithms like Bubble, Selection, Merge, Comb, Counting sort etc. Built mainly using **JavaScript, HTML and CSS**.
