

Rudrakshi Goel

B.Tech Computer Science Engineering Student

Email: rudrakshigoell@gmail.com | Phone: +91 8076975831 | Noida, India

Education

Bennett University, Greater Noida

B.Tech in Computer Science Engineering | CGPA: 8.55

Experience

Marketing and Media Analyst — Proverv Consulting

- Performed data-driven analysis of marketing campaigns and digital media performance.
- Evaluated consumer engagement metrics and optimized outreach strategies.
- Collaborated with cross-functional teams to improve brand positioning and visibility.

Research and Development — Weber Innovations (Bennett University Startup)

- Worked on research-driven product development and innovation initiatives.
- Contributed to technical ideation, feasibility analysis, and prototyping.
- Assisted in integrating emerging technologies into startup solutions.

Research & Publications

Quantum Effects in Overlapping VLSI Structures — Independent Research (Paper under preparation)

- Studied quantum overlap effects in advanced VLSI device geometries.
- Analyzed tunneling phenomena, quantum confinement, and wavefunction interference.
- Evaluated implications on scaling limits, leakage currents, and device reliability.

Projects

- **Financial Analyzer** — Built a financial data analysis and visualization tool for structured datasets.
- **Quantum Optimisation in Supply Chain Management** — Applied quantum optimization algorithms to complex supply chain problems.
- **SkillSage** — Developed an AI-powered tutoring platform with adaptive learning and real-time feedback.
- **Asteroid Predictor** — Used NASA APIs to predict near-Earth objects (Grade: 23/25).

Certifications

- Introduction to Artificial Intelligence — IBM / Coursera
- Explore Machine Learning using Python — Infosys Springboard
- Getting Started with Accelerated Computing in Modern CUDA C++ — NVIDIA
- Algorithmic ToolBox — UC San Diego (97.42%)
- Object Oriented Data Structures in C++ — University of Illinois Urbana-Champaign
- Data Visualization with R — IBM
