EDUCATION

Bennett University

Bachelor of Technology – Computer Science & Engineering

Aug. 2023 – May 2027

CGPA: 8.01

EXPERIENCE

Website Developer Intern @ Scalular

April 2025 – July 2025

React, Tailwind CSS, TypeScript

- Collaborated with a **5-member team** to build a **real-time garment quotation system** with dynamic pricing logic (fabric, GSM, print type, size scale, accessories) and tier-based discounts, **reducing quotation time by 95%**.
- Spearheaded development of **three role-based dashboards** (Admin, Client, Factory) enabling seamless data management and workflow oversight.

Research Intern @ Bennett University (Under Prof. Dr. Gaurav Sharma)

Nov 2025 – Present

AI for Sustainable Financial Systems, Python, Docker, NLP, Transformers, Time-Series Modeling

- Built an **automated ESG–financial data engine** integrating **25+ years of financials**, stock history, and ESG text for **50 global companies** using Transformers, Docker, and FMP APIs.
- Developed **ESG NLP pipelines** with embeddings, lexicon scoring, and controversy detection, achieving 92% accuracy in sentiment classification.
- Engineered **forecasting models** (XGBoost, LSTM, TFT) that **improved prediction accuracy by 23%** for revenue and 18% for stock returns.

PROJECTS

Neersence – AI-Powered Ocean Data Explorer

FastAPI, ChromaDB, Gemini, Next.js, Tailwind CSS, PostgreSQL

Github

- Developed **AI-powered natural-language search** for Argo float data, processing **15,000+ oceanographic profiles** and reducing data query time by 70%.
- Built a **RAG pipeline** using FastAPI, ChromaDB, and Gemini for semantic search and AI summaries, plus interactive visualization platform with global float mapping and auto-generated temperature/salinity visualizations.

CricArena

React, TypeScript, Tailwind CSS, Node.js, Express, PostgreSQL, Prisma, GSAP, Framer Motion

Github — Live

- Built a **full-stack cricket tournament hosting** and real-time ground booking platform for local, intercity, and interstate matches.
- Secured **backing from the Times of India Group** to continue CricArena as a startup and collaborate with local cricket grounds.

ResQ

Next.js, Typescript, Tailwind CSS, React, Shadcn UI, PostgreSQL, Prisma, NextAuth, Gemini, Mapbox

Github — Live

- Pioneered **AI image analysis pipeline** with emergency dispatch system; automatically classified incident severity, optimizing resource allocation and **improving response time by 15%**.
- Integrated **Mapbox APIs** for precise location tracking, enabling users to share exact coordinates for faster emergency response.

SKILLS

Programming Languages: JavaScript, TypeScript, C++ , Python .

Frontend Development: HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, Redux Toolkit, Tailwind CSS, Framer Motion, GSAP, Three.js.

Backend & Databases: Node.js, Express.js, FastAPI, RESTful APIs, Prisma ORM, Docker.

Gen AI/LLM Integrations: RAG (Retrieval-Augmented Generation), SentenceTransformer embeddings.

AI/ML : NumPy, Matplotlib, Pandas, Data Processing, API Scripting.

Programming & CS Fundamentals: C++ (DSA), Python, JavaScript/TypeScript, OOP, Computer Networks, Operating Systems.

Tools & Platforms: Git, GitHub, Postman, Linux, Vercel, Docker, Figma , Agile/Scrum.

ACHIEVEMENTS & CERTIFICATIONS

- Solved **400+ DSA problems** across LeetCode, Coding Ninjas, and GeeksforGeeks with focus on dynamic programming and graphs.
- Leadership:** Captained school cricket team to inter-school tournament victory; played for college team demonstrating agility, strategic planning, and teamwork under pressure.
- Neersence secured **first position** on our problem statement in internal SIH 2025 .
- Certified:** Algorithmic Toolbox (UC San Diego) — Database and SQL (IBM)
