EDUCATION

Bennett University, Greater Noida

B.Tech - Computer Science and Engineering - CGPA - 8.3

2023 – 2027

Greater Noida, Uttar Pradesh

EXPERIENCE

Scaled Uber AI Solutions

June 2025 - July 2025

Role - Data Annotation AI Support Intern / Freelancer

Gurugram, Haryana

- Performed data annotation and labeling for large-scale text and image datasets.
- Collaborated with clients and internal AI teams to optimize annotation workflows.
- Enhance model performance, scalability, and reliability

RPA Club Bennett University

Sep 2023 - Dec 2023

Management Core Member

Greater Noida

- Served in a **management role, supporting planning and club activities..**
- Coordinated with team members to manage events
- Gained hands-on exposure to robotics and **RPA Concepts** during my Time there.
- Assisted in promoting Robotic Process Automation (RPA) awareness among students.
- Contributed to smooth club operations by handling organizational, **and coordination responsibilities.**

PROJECTS

AI-Powered Solar Panel fault detection [🔗](#) | Python—Keras—VGG-16

July 2024

- This project focuses on the automated detection and classification of solar panels using deep learning.
- Leveraging VGG16, a pre-trained convolutional neural network (CNN), the model is fine-tuned to distinguish between faulty and non-faulty solar panels

Amazon-price-Tracker [🔗](#) | Python—Web Scraping—SMTP

Jan 2024

- Amazon Price Tracker is an automated Python-based tool that monitors product prices.
- It uses ScraperAPI to bypass Amazon's anti-scraping mechanisms
- BeautifulSoup to extract real-time pricing data
- The script runs periodically, checking the price at set intervals (e.g., hourly)
- By integrating secure email handling with environment variables.

Fit track Pro [🔗](#) | Javascript-HTML-CSS

Sept 2025

- The FitTrack Pro smart scale and app provide comprehensive body composition analysis
- seamless data synchronization with major fitness ecosystems..
- comprehensive body composition analysis, personalized health insights and coaching

Twitter Sentiment Analysis - [🔗](#) | Python—NLTK—Google Colab

Dec 2023

- Developed an **front-end** NLP-based machine learning model
- Tweet sentiment classification using NLTK preprocessing and TF-IDF vectorization
- Trained **Logistic Regression model** a Logistic Regression model **with Scikit-learn**
- Converted it into numerical representations using TF-IDF Vectorization.

TECHNICAL SKILLS

Languages: JavaScript, C++, Java, SQL, Python

Technologies/Frameworks: Keras, QGIS, SciKit-learn, MongoDB

Developer Tools: VS Code, Replit, Google Earth Engine, IntelliJ Idea Ultimate, Github

CERTIFICATIONS

- Databases and SQL for Data Science with Python- Coursera
- Data Structures- UC San Diego
- Statistics for Data Science with Python- Needy hand Foundation

EXTRA-CURRICULAR

- NATIONAL DEFENCE ACADEMY: Shortlisted for NDA (TES-48)
- INTERNATIONAL MARITIME INSTITUTE(AIR-5): QUALIFIED
