Education

Bennett University

B.Tech AI-ML

Sep. 2023 – May 2027

CGPA: 8.41 (2nd year)

Sophia Girls Senior Secondary School, Saharanpur

Central Board Of Secondary Education

March 2022 – Feb 2023

XII - 85.6

Sophia Girls Senior Secondary School, Saharanpur

Central Board Of Secondary Education

Feb 2020 – March 2021

X - 92.4

Technical Skills

Languages: Python, C++, HTML/CSS, JavaScript, SQL, ReactJS, NodeJS

Developer Tools: VS Code, Google Colab Editor

Libraries: Numpy, Pandas, Matplotlib, Seaborn, TensorFlow, Pytorch

Tools/Frameworks: Linux, GitHub, Latex, Mysql, MongoDB, PyCharm, Django, Jira, AWS, Azure, Google Cloud Platform

Coursework: Data Structure, Object-Oriented Programming (OOPs), Artificial Intelligence, Machine Learning, Database Management, Cloud Computing

Projects

AI-Based Medical Report Assistant 🤖

November 2025

Built an end-to-end AI pipeline for automated blood report and X-ray analysis with explainability.

- Technologies: Python, TensorFlow/Keras, PyTorch, OpenCV, sk-learn, Gemini API, PDFPlumber, Grad-CAM, SHAP
- Developed a dual-pipeline medical AI system with ANN-based diabetes/cholesterol risk prediction from blood reports and a multi-head CNN for X-ray fracture detection (finger/wrist), using SHAP and Grad-CAM (AUC: 0.93, 0.82, 0.90).

Image Super-Resolution Residual SRCNN 🤖

October 2025

Developed a deep learning-based image super-resolution system to reconstruct high-resolution images.

- Technologies: Python, TensorFlow/Keras, OpenCV, NumPy
- Implemented Nearest, Bilinear, Bicubic baselines and trained a Residual SRCNN using patch-based learning; evaluated with MSE, PSNR (26.32 dB), SSIM (0.7786) and benchmarked against FSRCNN and EDSR.

Neighborly: A Safer Gathering, One Friendly Face at a Time 🤖

February 2024

Created a facial recognition security system for criminal identification in social gatherings.

- Technologies: AI/ML, React.js, MongoDB, OpenCV, DeepFace, Flask/Django, Python
- Developed a secure web platform with FBI database integration for real-time threat detection and facial recognition.

Hackathon Participation & Learning Exposure

Myntra HackerRamp (WeForShe)

June. 2024 – July 2024

Project: FitAi – AI Body Type Scanner and Outfit Recommender

Delhi

- Developed an AI-powered image analysis tool to detect body type from user-uploaded pictures and recommend personalized outfits.
- Integrated ML (TensorFlow, OpenCV) for body detection and Python (Flask), JS, HTML, CSS for the website interface.
- Top 4% from 30,000+ registered team in this national - level competition.

Smart India Hackathon 2023

September 2023

Project: SheVitalityLife – Empowering Women Through Smart Healthcare

Bennett University

- Developed a website during the hackathon focusing on women's health, integrating a chatbot for health-related queries.
- Utilized AI, HTML, CSS, JavaScript, and Python to create an interactive and user-friendly platform.
- Outcome: Gained hands-on experience in problem-solving, teamwork, and real-world application of technology.

November 2024

Positions of Responsibility

Zenart Club

Sep. 2023 – May 2024

PR and Outreach

Bennett University

- Led outreach for college events, securing sponsorships and partnerships for the Annual Cultural Fest and other events.
- Negotiated with sponsors, event managers, and representatives from other colleges to ensure smooth collaborations.
- Managed event promotions through social media, emails, and campus-wide announcements to maximize engagement.
