SUMMARY

Third-year B.Tech CSE student (CGPA 9.1) with mastery in DSA (700+ LeetCode problems). Experienced in building Full Stack applications and AI/ML solutions. Former AI Engineer intern proficient in Spring Boot, React.js, and Deep Learning. Tech Lead for GFG and GDG student chapters with strong leadership and problem-solving abilities.

EDUCATION

Bennett University

Bachelor of Technology (B.Tech.) Computer Science and Engineering

Greater Noida

CGPA: 9.1

SKILLS

Languages: Java, C++, Python, JavaScript, SQL, HTML/CSS

Frameworks/Libraries: Spring Boot, React.js, Redux, Node.js, Tkinter, Kafka, REST APIs

AI/ML: OpenCV, TensorFlow, PyTorch, Scikit-learn, RAG, ChromaDB

Tools/DB: MySQL, MongoDB, DataStax, Git, JDBC

Soft Skills: Leadership, Team Collaboration, Analytical Thinking, Effective Communication

EXPERIENCE

AI Engineer

April 2025 – July 2025

Computing Mind Technology

Greater Noida

- **Video Analysis Tool:** Engineered an automated pipeline using **Python** and **OpenCV** to extract procedural steps and keyframes from screen recordings, generating instant documentation.
- **RAG-Based Resume Analyzer:** Built a skill-gap analysis platform integrating **OpenAI API**, **Vector Databases**, and **React.js**, enabling context-aware resume matching against job descriptions.
- **Demo Script Generator:** Developed a scraping system using **Selenium/BeautifulSoup** to parse product pages and generate sales pitches via LLM integration.
- **Job Search Agent:** Designed an Agentic AI system that aggregates listings from multiple platforms and optimizes user profiles using real-time data processing.

PROJECTS

RAG Model for Chemistry Notes | *OpenAI, ChromaDB, Python* | [Git Link](#)

- Developed a RAG system to process PDF notes and answer user queries with high accuracy using vector retrieval.

Expense Tracker App | *Spring Boot, React-Native, MySQL* | [Git Link](#)

- Built a full-stack scalable Expense Tracker App with REST APIs for Expense management and Expense Tracking.

DeepFake & NSFW Detection | *Deep Learning, CNNs* | [Git Link](#)

- Designed a detection tool utilizing Convolutional Neural Networks to identify face-swapped videos and explicit content.

Video Navigator System | *Computer Vision, CNNs* | [Git Link](#)

- Created an object detection tool that generates timestamped metadata for faces and text within video streams.

Custom Video Dataset Creator | *Python, Image Processing* | [Git Link](#)

- Engineered a smart labelling tool to extract frames and annotate custom objects for training ML models.

AWARDS & HONORS

1st Position – GFG Hackfest (Received Ticket to Finale)

GeeksforGeeks

1st Position – Bennett's Project Showcase Competition (2024)

Bennett University

1st Position – Bennovate (Title: Ideathon Winners)

Bennett University

1st Position – DSA Offline Contest

Allan Turing Club

3rd Position – Code Roast Coding Competition

IEEE

4th Position – Galactic Escape Coding Competition

GeeksforGeeks BU
