SKILLS

Technical Skills: Machine Learning, Data Analysis, Deep Learning, Software Development Life Cycle (SDLC)

Languages: Python, HTML, CSS

Logical data analyst skilled in requirement analysis, software development, and database management. Natural problem-solver possessing strong cross-functional understanding of information technology and business processes. Goal-driven strategic leader and strong entrepreneurial spirit, open mind, and willingness to take on new challenges that require patience and perseverance.

PROJECTS

AgroNest: AgroNest is an innovative online platform designed to empower farmers by integrating farm tool renting, an e-commerce marketplace for farming supplies, AI-powered crop disease detection, real-time weather forecasting, and image-based weed and seed quality analysis. The project aims to enhance productivity, efficiency, and sustainability in agriculture by providing a seamless, technolog. Unlike existing competitors, AgroNest offers a comprehensive, unified platform that combines multiple agricultural services in one place.

RetinoDetect: A website designed to assist in the early detection and classification of Diabetic Retinopathy (DR) by allowing users to upload retinal images for automated analysis. The platform leverages deep learning models, particularly ResNet50, to classify images into five different DR severity stages: No DR, Mild, Moderate, Severe, and Proliferative DR. With an accuracy exceeding 80%, the model efficiently processes retinal scans to provide reliable diagnostic insights.

WORK EXPERIENCE

Xanthron Model United Nations
Founder

May 2023 - Present

- Founded Xanthron MUN in May 2023 with the mission of hosting a high-quality conference focused on robust debate and diplomacy.
- Served as Director General for the inaugural edition in October 2023, overseeing event logistics, and the formation of committees.
- Served as President for the second edition in August 2024, taking on a more strategic role in event direction and decision-making.
- Expanded the conference to 550+ delegates in its second edition, making it the largest Model UN conference in Faridabad.

Data Science Society, Bennett University
Designer

Sept 2023 - Aug 2024

- Worked with the Data Science Society team to design visually engaging content, including event posters, presentations, and social media graphics.
-

EDUCATION

B.Tech. Computer Science

Bennett University, Greater Noida, India
Current CGPA - 8.72
Expected in 05/2026

High School Diploma (10+2)

The Modern School, Faridabad, Haryana
12th Percentage - 90%
Completed on 04/2022

ACHIEVEMENTS

Presented and published a research paper at Gautam Buddha University's IEEE Conference (IC3ECSBHI-2025) titled "Leveraging Transfer Learning for Potato Crop Disease Classification: A Comparative Study of AI Techniques"

CERTIFICATIONS

- Improving Deep Neural Networks: Hyperparameter Tuning, Regularization, and Optimization by DeepLearning.AI through Coursera
- Data Structures: an online course authorized by University of California San Diego and offered through Coursera
