

VANSH MEHTA

Greater Noida, Uttar Pradesh, India

Phone: +91 9953266232 | mvansh705@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

AI-focused Computer Science student with expertise in ML, full-stack development, and cloud technologies. Winner of Smart India Hackathon 2023, Google AI Campus Fest 2023, and published IEEE researcher.

EDUCATION

Bennett University

Greater Noida, India

Bachelor of Technology in Computer Science Engineering (Artificial Intelligence), CGPA: 8.4/10.0

2023 - 2027

TECHNICAL SKILLS

Programming: Python, C++, SQL, HTML, CSS, JavaScript

Web Development: React.js, Next.js, Node.js, Express.js, FastAPI

Machine Learning: TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Prophet.

Cloud & Data: Microsoft Azure.

Agentic AI: LangChain, LLMs, Retrieval-Augmented Generation (RAG), Gen AI.

Other: REST APIs, Chrome Extensions, Microservices, ETL Pipeline Development, CI/CD, Git, Data Structures Algorithms

PROFESSIONAL PROJECTS

FLOATCHAT – AGENTIC AI Ocean Intelligence [Next.js, LangChain, Python, Azure] — [Live Link](#) 2025

- Developed an agentic AI system enabling natural-language interaction with ARGO ocean data using LangChain, and GPT-4, automating NL→SQL queries and reducing data retrieval time by 85%, empowering faster marine insights
- Integrated RAG-based context retrieval with VectorDB and Azure OpenAI to process 10M+ ARGO float records in real-time, improving research efficiency by 5× and enabling instant exploration of ocean patterns
- Deployed on Azure with a modular FastAPI–Next.js stack, enhancing ocean forecasting accuracy by 40%, reducing ships fuel consumption in route planning by 20%, and accelerating data-driven decisions for sustainability initiatives

KRISHI SAATHI - Commodities Data Analysis System [Next.js, Python, Azure] — [Live Link](#) 2024

- Created comprehensive price forecasting system for 1800+ agricultural commodities across 3200+ markets using Prophet model and time series analysis
- Established Madeleine Architecture and star schema for big data processing handling of agricultural market information with 90% query performance improvement
- Launched on Azure with auto-scaling capabilities ensuring 99.9% uptime and supporting concurrent access for users with Next.js frontend and Django REST API

UDYAN SAATHI - Environment Monitoring System [React.js, Python, Azure] — [Live Link](#) 2023

- Established comprehensive real-time environmental monitoring dashboard with AQI/WQI tracking, weather forecasting, and GRAP-based SOS alert system serving users
- Trained machine learning models for air quality forecasting using historical trends and sensor inputs achieving 85% prediction accuracy
- Designed interactive data visualization with maps and graphs with multi-layered architecture processing 10,000+ environmental data points daily

ACHIEVEMENTS & AWARDS

Winner - Smart India Hackathon 2023: Led 6-member team to national victory among 2,64,000+ participants developing innovative AI solution

Winner - Google AI Campus Fest 2023: Recognized for outstanding machine learning project implementation and presentation

IEEE Research Publication: Published "A MultiResUNet-based Deep Learning Architecture for Accurate Lung Segmentation in Chest X-Rays"

Technical Leadership: Mentored 100+ junior developers, conducted 10+ technical workshops, featured in 2 podcasts

Project Showcase Winner 2023 & 2024: Awarded for AI-focused innovations at Bennett University in consecutive years
