

VISHAL KUMAR

vishalvk0809@gmail.com — +91-6299342711 — [LinkedIn](#) — [GitHub](#)

PROFESSIONAL SUMMARY

Software Engineer specializing in AI/ML, Cybersecurity, and Full-Stack Development. Delivered 10+ production projects including 5 ML models, 2 GenAI applications, and 3 security tools. Achieved 30-40% prediction accuracy improvements, 20%+ system efficiency gains, and secured 5000+ IoT devices. Expert in GenAI, RAG systems, agentic AI, and data engineering with demonstrated success in building scalable solutions.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL, HTML5, CSS3

ML/AI & GenAI: TensorFlow, PyTorch, Scikit-learn, LangChain, Hugging Face, OpenCV, RAG, Ollama, Agentic AI

Data Engineering: Pandas, NumPy, Hadoop, Spark, Matplotlib, Seaborn, Tableau, Power BI, Plotly

Web & Frameworks: React.js, Node.js, Flutter, Jest, React Testing Library, RESTful APIs

Databases & Cloud: MySQL, PostgreSQL, MongoDB, AWS

Security & IoT: Smart Grid Security, IoT Security, AMI Encryption, Protocol Testing, Firmware Analysis

Concepts: Hypothesis Testing, Regression, Clustering, Time Series Forecasting, Computer Vision, UI/UX

Tools: Git, Jira, Jupyter, VS Code, Excel, Slack

PROFESSIONAL EXPERIENCE

Capgemini IT India Pvt. Ltd.

May 2025 - Present

Associate Software Engineer

Gurugram, India

- Designed and deployed LLM-based GenAI Timestamping Agent using Ollama's RAG framework, processing 10K+ event records daily with 30% improved traceability and 40% reduction in audit time
- Engineered autonomous AI agents for real-time log labeling, anomaly detection, and failure prediction achieving 35% improvement in detection accuracy through multi-agent collaboration and pattern correlation
- Led Smart Meter AMI encryption and IP security testing, reducing vulnerabilities by 45% across 5000+ devices and ensuring secure data exchange in smart grid infrastructure
- Conducted protocol testing and firmware vulnerability assessments, implementing mitigation strategies to strengthen cyber resilience against IoT threats
- Executed manual QA testing for presentation layer features with configuration and display validation

Glien Digital World Pvt. Ltd.

September 2024 - January 2025

Frontend Web Developer

Noida, India

- Created 8+ responsive web applications using React.js, HTML5, CSS3, JavaScript, and Flutter with 30% improvement in cross-platform performance
- Integrated 5+ ML APIs delivering 25% UX enhancement for client dashboard and e-commerce platform projects
- Architected reusable component libraries and wrote comprehensive unit/integration tests using Jest and React Testing Library, ensuring 95%+ code coverage
- Collaborated in Agile environment using Git, Jira, and Slack for seamless cross-functional team coordination
- Ensured cross-browser compatibility and translated Figma/Adobe XD designs into pixel-perfect implementations

KEY PROJECTS

Agent Timestamp Failure Detection System

2025

Python, GenAI, Ollama, RAG

- Implemented GenAI model for detecting system failures using timestamp logs, decreasing error rates by 35%
- Refined monitoring efficiency for large-scale distributed systems processing millions of events

Bus Demand Forecasting System

2025

ARIMA, LSTM, Python, Time Series

- Forecasted seat demand 15 days ahead for 100K+ bookings using ARIMA and LSTM time-series models
- Achieved 20%+ improvement in planning accuracy, optimizing resource allocation and revenue management

Advanced Lane Detection System

2023

OpenCV, Computer Vision, Python

- Programmed real-time computer vision model achieving 90%+ accuracy at 30 FPS using adaptive filtering
- Strengthened lane detection accuracy by 15% for autonomous driving assistance applications

EDUCATION

Bennett University

August 2022 - August 2026

Bachelor of Technology in Computer Science — CGPA: 7.63/10

Greater Noida, India

CERTIFICATIONS

IBM: Artificial Intelligence (2024) — Supervised Machine Learning - Regression (2024) — Google: Computer Networking (2023) — Microsoft: Computer Security & Operating Systems (2023)
