Computer Science Engineer

EDUCATION

Bachelor of Technology in CSE, Bennett University, CGPA 8.02	2022-2026
--	-----------

PROJECTS

Food Snap	Jun' 2025
------------------	-----------

Tech Stack: Torch, Transformers, Streamlit, TensorFlow, Python

Applying Machine Learning and Computer Vision to classify different Indian dishes using user provided images.

- The model achieved 75% accuracy using tiny SWIN Transformer
- The model was able to classify nearly 80 different indian dishes

Demeter	Oct' 2023
----------------	-----------

Tech Stack: Torch, Transformers, Python, TensorFlow, Streamlit

AI driven application which aims to classify different diseases found in plants through computer vision.

- The model achieved 98% accuracy in classification using SWIN Transformer
- The model classifies over 30 different classes of disease in plants

Brand Aid	Nov' 2022
------------------	-----------

Tech Stack: fastapi, ManGum, Python, OpenAI,

A tagline and keyword generator for businesses.

- Generates highly relevant tagline and 4-5 keywords tailored to the product description.
- Built the system using GPT 3.5 with a Python backend and NextJS front-end

SKILLS

Languages: c/c++, Python

Frameworks: TensorFlow, Keras, PyTorch

Databases: MySQL

Areas of Interest: Machine Learning, Generative AI, Natural Language Processing, Deep Learning, Artificial Intelligence, Computer Vision, Object Oriented Programming, Computer Engineering

CAMPUS INVOLVEMENT

• Drone Society of Bennett University, Vice Chair Person	2024-2025
--	-----------

CERTIFICATES AND PROFILES

Certificates: [Sample Based Learning Methods](#) by University of Alberta, [Generative AI with Large Language Models](#) by DeepLearning.AI, [Exploratory Data Analysis for Machine Learning](#) by IBM
