SUMMARY

Computer Science student (CGPA: **9.59**) with advanced skills in DSA (**500+ LeetCode**) and full-stack development. Experience in developing end-to-end software solutions, collaborating in teams and delivering production-ready features. Seeking Software Engineering roles to contribute with clean architecture, scalable systems, and rapid learning.

EDUCATION

Bachelor of Technology in Computer Science and Engineering
Bennett University, Noida, UP

Aug 2023 – 2027
CGPA: 9.59

TECHNICAL SKILLS

Programming Languages: C++, JavaScript, TypeScript, Python
Development: React.js, Next.js, Node.js, Express.js, HTML, CSS, SQL
Databases: MySQL, MongoDB, PostgreSQL, Prisma ORM
Tools & Platforms: Git, Github, Docker, Postman, Jupyter Notebook, Jira
CS Fundamentals: Data Structures & Algorithms, OOPs, DBMS, Operating Systems
Data Science: Data Cleaning, Feature Engineering, Exploratory Data Analysis (EDA)

EXPERIENCE

Data Analytics Intern | Imarticus Learning

May 2025 – July 2025

- Analyzed large business datasets using SQL, Python, and Power BI to extract actionable insights.
- Applied feature engineering techniques to optimize model accuracy and improve data utility.
- Visualized insights using Matplotlib and Seaborn for weekly stakeholder reports.
- Collaborated within a team of 5–6 to build dashboards and present key business insights.

PROJECTS

MeetCode | Coding Platform for Technical Interviews | Live Demo | 

Mar 2025 – Apr 2025

- Built a real-time collaborative coding platform using TypeScript and Next.js, supporting multiple concurrent users in a single interview session.
- Implemented reactive state management with Convex, enabling sub-second real-time updates across the application.
- Integrated Stream API for video calls, scheduling, and session recordings, reducing interview setup time by 50%.

FreelanceHub | Freelance Marketplace Platform | 

Sep 2025 – Nov 2025

- Designed and developed a full-stack freelance marketplace enabling freelancers and clients to connect using Next.js and Node.js.
- Implemented user authentication, role-based access, and project posting workflows to streamline hiring and job management.
- Integrated MongoDB for scalable data storage, supporting user profiles, job listings, and proposals.

Saahasini | Women Safety Application | 

Dec 2024 – Jan 2025

- Developed a mobile safety application with real-time tracking and SOS features for women.
- Integrated Google Maps API for precise location monitoring and implemented critical SOS alert functionality.
- Pioneered a location-based safety assessment system to enhance user security.

ACHIEVEMENTS

Dean's List Award – Awarded 2 times for top-tier academic excellence at university level.
Smart BU Hackathon – Secured a position in the Top 20 by creating Saahasini, a women's safety app.
Solved 500+ DSA Problems on LeetCode improving speed, accuracy, and mastery of core algorithmic patterns.
