

Shreyansh Tiwari

AI Engineer | Full-Stack Developer | RAG & Agentic AI Systems

Lucknow, India | 9792774846 | shreylol321@gmail.com

GitHub: github.com/Conspirer | LinkedIn: [linkedin.com/in/shreyansh-tiwari-42a872235/](https://www.linkedin.com/in/shreyansh-tiwari-42a872235/)

SKILLS

Languages: Python, JavaScript, C++, Java

Web: HTML, CSS

AI & Data: Deep Learning, RAG (Retrieval-Augmented Generation), Data Analysis

Backend & APIs: REST APIs, JWT Authentication, API Key Management

Tools & Platforms: Git, GitHub, Railway, Render

EXPERIENCE

AI Engineering Intern — The Misty

- Worked on building Retrieval-Augmented Generation (RAG) pipelines for AI applications
- Developed full-stack features connecting AI models to user-facing web interfaces
- Built and tested agentic AI workflows for multi-step task execution
- Contributed to production-grade AI systems used in real applications

Independent Developer / Project Work

- Built and deployed multiple full-stack and AI-powered applications
 - Worked with real-world datasets, APIs, authentication systems, and deployment pipelines
 - Designed end-to-end systems from model to user interface
-

PROJECTS

AI BaaS — AI Backend as a Service

Tech: Python, REST APIs, JWT, Railway

- Built a production-ready AI backend that allows developers to call AI models via secured APIs
- Implemented JWT authentication, API key generation, rate limiting, and request logging
- Added usage analytics to track API consumption per user
- Deployed the system publicly with interactive API documentation

Plant Doctor — AI-Powered Plant Disease Diagnosis System

Tech: Python, Deep Learning, RAG, HTML

- Built a full-stack web app that detects plant diseases from uploaded leaf images
- Integrated a deep learning model for disease classification
- Implemented Retrieval-Augmented Generation to provide scientifically grounded treatment recommendations
- Deployed the application with a live dashboard for users

Netflix EDA Dashboard

Tech: Python, JavaScript, HTML, CSS

- Performed exploratory data analysis on Netflix content data
- Built an interactive dashboard to visualize genres, release years, and trends
- Processed and cleaned data using Python and visualized insights using JavaScript

VoyageFlow — Travel Planning Web App

Tech: HTML

- Designed and built a responsive travel planning website
 - Created a clean UI for organizing trip information and destinations
 - Deployed the application as a live website using GitHub Pages
-

EDUCATION

B.Tech in Computer Science (AI & ML)

Bennett University | 2023 – 2027

CGPA: 9.22
