EXPERIENCES

Hackaccino Hackathon, Bennett University

Greater Noida, IN

Organized by **Computer Society of India**

Apr 2024

- Collaborated with a team to develop an innovative digital hub that streamlines student engagement in college festivals and events.

Gen AI Hackathon, Rishihood University

Sonipat, IN

Winner of Gen AI Hackathon

Apr 2025

- Collaborated with a team to win the Gen AI Hackathon by developing a generative AI-powered website for automated content creation.

PROJECTS

- **Bloomify (2025).**
A flower selling website where users can buy flowers, and sellers can list their products such as seasonal flowers, indoor flowers, tools for gardening, plant nutrition and art/pottery.
- **Fusion (2025).**
AI-powered content creation studio for social media creators. It helps creators to generate content ideas, optimize their posts, and analyse their performance.
- **Sentinel (2025).**
A machine learning based network intrusion detection system for network threat detection.
- **The Movie Project (2024).**
A sleek and responsive movie search webpage built with React.js and Tailwind CSS. It fetches real-time data using APIs to display the latest trending and top-searched movies.
