## Professional Summary

An enthusiastic Computer Science student with a strong interest in building AI-driven, data-intensive systems. Currently exploring applied machine learning, LLM-based pipelines, and backend services through hands-on projects and production-oriented work. My academic foundation in deep learning, data analytics, and system design, combined with proficiency in Python and Git, equips me to contribute effectively to product-focused AI solutions.

## Education

**Bachelor of Science in Computer Science Engineering, Bennett University (Times Of India Group)**

Aug 2023 - present

**Specialization :** Artificial Intelligence

## Skills

- **Core:** C++, Data Structures & Algorithms, Python ,MATLAB
- **AI/ML & NLP:** LLMs, LangChain, RAG, Hugging Face, TensorFlow, PyTorch, Scikit-learn, NumPy, Pandas
- **Backend Development:** Python, Flask, FastAPI, MongoDB, MySQL
- **Frontend & Cross-Platform:** React Native, JavaScript, TypeScript
- **DevOps & Tools:** Git, Docker, Figma, Selenium, BeautifulSoup
- **Soft Skills:** Problem-Solving, Presentation Skills, Communication Skills, Team Work, pro-active

## Work Experience

**Mentor @ GirlScript Summer of Code (GSSoC'25) , New Delhi**

Aug 2025 - present

- Mentored and guided a team of 15+ open-source contributors on a multi-modal AI project, utilizing NLP pipelines and transformer models. Applied statistical analysis techniques to evaluate model performance and guide optimization efforts.
- Oversaw the review and merging of over 25+ pull requests, improving overall code quality and enforcing CI/CD best practices using Git.

**AI/Tech Intern @ Univest , Gurgaon**

June 2025 - Aug 2025

- Software development internship with a competitive nature, gaining practical experience in a fast-paced, product-driven environment
- Contributed to the development of intelligent chatbot systems and optimized backend infrastructure, focusing on scalability, performance, and seamless user interaction in the fintech domain

## Projects

**EcoPlay** [link](#)

- EcoPlay is a unique gamified environmental platform built with React, Vite, Tailwind, and Framer Motion.
- Uses SQL for user progress, rewards, and leaderboards.

**UnivestBot** [link](#)

- LLM-powered RAG chatbot using FAISS for vector search and LangChain for orchestration
- Supports async API routing for real-time, context-aware financial query resolution. Response time 10x efficient.

**Market Hawks** [link](#)

- Used latency measurement during data/API fetch to assess performance impact
- Implemented this as part of a learning-focused evaluation to improve trading system responsiveness

**GyaanGo** [link](#)

- Built an AI-powered app for gamified offline learning in remote regions. potential to increase learning by 45%
- worked with different 3+ APIs and 5+ datasets for robust learning .

## Certifications

Infosys IdeaThon - [certificate link](#)

Univest Internship offer - [certificate link](#)  
+ completion letter

Build With India - [certificate link](#) (top 100 teams)

## Achievements

- Published research paper **PATHS: Predictive AI Traffic Handling System** submitted to F1000 Reseach
- ranked top 50 Mentors at GGSOC 2025 with 300+ Mentors
- rank 42 in college and under 5k globally on Codolio platform
- Smart India Hackathon - Achieved rank 26 out of 500+ teams in internal round

## Positions Of Responsibility

**OSS Lead @ Google Dev Group (GDG) , Bennett University**

Feb 2025 - Present

- Contributed to open-source projects via code, issue resolution, and peer collaboration.
- Assisted in organizing OSS-related workshops and events.

**placement committee member @ Career Services Center , Bennett University**

May 2025 - Present

- Led student-industry engagement efforts.
- Coordinated placement drives, managed outreach, and organized skill-building workshops.

**Design head Indian Blockchain Fraternity (IBF) Club , Bennett University**

Aug 2024 - Aug 2025

- Leading design strategy and branding for blockchain platforms.
- Mentoring junior designers and collaborating with developers to craft user-centric blockchain solutions
