Profile

Computer Science student with strong skills in **React.js, JavaScript, HTML, CSS** and solid foundation in **Data Structures and Algorithms**. Passionate about building **responsive, scalable web applications** with clean code.

Education

Bennett University Aug 2023 – May 2027

Bachelor of Technology – Computer Science and Engineering

- CGPA: 9.54 / 10
- Relevant Coursework: Object Oriented Programming, Databases, Artificial Intelligence & Machine Learning, Data Structures and Algorithms, Operating Systems, Computer Networks, Data Mining, Advanced Data Structures and Algorithms

Skills

Programming Languages: C++, Java, Python, JavaScript, TypeScript, HTML, CSS

Web Frameworks & Libraries: React.js, Node.js, Express.js, Bootstrap, Tailwind CSS

Databases: MongoDB, SQL, Firebase

Developer Tools: Git, GitHub, Figma

Experience

React.js Developer Intern, Inscriptis, Mumbai (Remote) Jul 2025 – Present

- Developed and optimized dynamic UI components (including modals) using **React.js**, ensuring responsive and user-friendly interfaces.
- Integrated **REST APIs** to enable seamless data flow and real-time updates in web applications.
- Contributed to a **spreadsheet application integrated with AI**, enhancing performance and user interaction through virtualization techniques.
- Debugged and resolved frontend issues, improving application stability and reducing defects.
- Collaborated effectively in Agile workflows, gaining experience in teamwork, code reviews, and professional communication.

Projects

ACADEMIX – University Collaboration Platform 2025

- Designed and developed an all-in-one platform for university students to manage academic Q&A, events, and travel coordination.
- Implemented **faculty-verified Q&A**, event RSVPs, carpooling, and secure role-based access controls using **React.js, Node.js, Express.js, MongoDB**.
- Enhanced student engagement and coordination across academics, events, and travel through a centralized, user-friendly platform.

MEDIMATE – AI-Powered Medical Recommendation System 2024

- Developed a health advisory application that predicts medical conditions from symptoms and provides personalized recommendations for medications, precautions, workouts, and diet plans.
- Leveraged **Machine Learning, Python, Tkinter, and SQLite** to deliver AI-powered symptom analysis and wellness suggestions.
- Enabled users to make informed health decisions with accurate, AI-driven insights.

Expense Tracker – Personal Finance Tool

2024

- Designed and implemented a desktop application to help users track and categorize personal expenses, calculate savings, and set financial goals.
- Integrated interactive graphical analysis using **matplotlib** for clear visualization of spending patterns.
- Empowered users to manage finances effectively through intuitive tracking, goal-setting, and visual insights using **Python** and **Tkinter**.

Awards and Achievements

- Placed on the **Dean's List** at Bennett University for academic excellence (2024)
- Placed on the **Dean's List** at Bennett University for consistent academic performance (2025)
- Led a team in the **Smart BU Hackathon**, contributing to real-world problem solving (2024)
