Education

Bennett University (The Times Group)

Greater Noida, U.P, India

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.54 / 10.0

2022-2026

Relevant Coursework: AI & ML, Data Structures & Algorithms, Software Engineering

Narayana Junior College

Andhra Pradesh, India

Intermediate (MPC Stream)

2020-2022

DR. KKR Gowtham Concept School

Andhra Pradesh, India

10th Grade (State Board), Percentage: 100/100

2018-2020

Secured a solid foundation in core academic subjects

University Projects

FETO-Scan: Developed a specialized U-Net architecture for image segmentation, processing over 1M+ images. Optimized the model to improve segmentation speed by 40%, reducing processing time from hours to minutes for large-scale datasets.

Resume Screening and Ranking System : Built an AI-driven resume screening and ranking system leveraging NLP and machine learning. Designed to parse resumes, extract key information, and rank candidates based on job descriptions, improving the hiring process efficiency.

Fake News Detection Using NLP and Multi-task Transfer Learning: Completed a research paper focusing on detecting misinformation through BERT-based multi-task models integrated with Graph Attention Networks. The system analyzes textual content, publisher bias, and user engagement to accurately classify fake news. Achieved high performance on real-world datasets.

Achievements

Maintained an impressive LeetCode contest rating of 1822 while solving over 150 algorithmic problems monthly; demonstrated advanced analytical abilities with a strong emphasis on efficiency enhancements and optimizing solutions.

Completed relevant courses on Infosys Springboard and Coursera to strengthen technical skills and industry knowledge. Continuously develop tech expertise through social media learning, with a strong enthusiasm for advanced AI concepts. Skilled in designing with Canva and automating tasks such as presentations and reports using cutting-edge AI tools.

Skills

Language Skills: Python, C, C++, HTML, CSS.

Technical Skills: Deep Learning (CNNs, ResNet, SRU), U-Net, OpenCV, Canva design, AI tools.

Developer Tools: Android Studio, Google Colab, Trae, canva.

Soft Skills: Troubleshooting and resolving issues, Collaboration, Optimizing project timelines.

Additional

Volunteer Experience: Actively participated in 10+ various volunteer initiatives, fostering teamwork and leadership skills through collaboration with peers.

Interests/Hobbies: Actively exploring and applying emerging machine learning techniques and advancements in AI to expand knowledge and practical skills. Engages in cooking as a creative hobby, which cultivates patience and meticulousness.
