SUMMARY

Dedicated B.Tech Computer Science candidate at Bennett University, focusing on Data Science. Proficient in Python, SQL, C++, and data analysis with practical expertise in machine learning and visualization. Experienced with data tools such as Pandas and Power BI.

WORK EXPERIENCE

Data Scientist, Amenity Forge

April 2025 - December 2025

- Managed a technical team to provide client-centric services and successfully implement AI-driven projects and solutions.
- Directed project implementation from conception through deployment, with alignment to business objectives.

PROJECTS

E-commerce recommendation system using customer insights. [\[GitHub\]](#) Oct 2024 - Dec 2024

- Developed a recommendation system based on Walmart customer ratings to find and recommend popular products. Conducted data analysis and filtering to produce insights, saving results in CSV format. Developed a website to show popular products, improving user experience and product visibility.

Up Health: AI-Powered Health Platform & Natural Language Symptom Analysis.

[\[GitHub\]](#)

Mar 2025 -Aug 2025

- AI-powered health platform integrating ML models (Random Forest, Gradient Boosting) with NLP for comprehensive assessments. Features migraine prediction, cardiovascular risk analysis, intelligent symptom interpretation via LLM, personalized recommendations, diet planning, and real-time monitoring through modern full-stack architecture.

Legal Document Generation Platform - AI-Driven RAG System with Semantic Search

[\[GitHub\]](#)

Sept 2025 - Dec 2025

- Architected full-stack legal document generation platform using RAG architecture with FAISS vector search & Google Gemini AI, automating creation of 35+ professional legal documents. Implemented semantic search with sentence transformers, Next.js/TypeScript frontend & FastAPI backend, featuring AI chatbot assistant.

EDUCATION

Bachelor of Technology in Computer Science s Engineering

Aug 2023 - Aug 2027

Relevant coursework includes Data Structures & Algorithms, Database Management Systems, Machine Learning, Data analysis, Data mining and Software Engineering.

GPA: -8.8

TECHNICAL SKILLS

- Languages:** Python, C++, React JS, Html, CSS, Java
- Databases:** MySQL, PostgreSQL, Mongo DB
- Skills:** Data analysis, Machine learning, Deep learning, MS Excel, Artificial Intelligence, Time series analysis.
- Tools:** Power BI
