PROFILE

Full Stack Developer skilled in building scalable web and mobile applications using MERN, React Native, and Stencil.js. Experienced in API integration, performance optimization, and end-to-end feature deployment. Strong problem-solving foundation in Data Structures and Algorithms with a focus on delivering intuitive, high-quality user experiences.

EDUCATION

Bennett University <i>B.Tech in Computer Science Engineering (CGPA: 8.26)</i>	Greater Noida, India 2022 – 2026
St. Xavier's High School <i>Class XII, CBSE (82.8%)</i>	Gurugram, India 2021 – 2022
St. Xavier's High School <i>Class X, CBSE (84.16%)</i>	Gurugram, India 2019 – 2020

EXPERIENCE

ADP Pvt. Ltd. — ADP Experience Letter <i>GPT Intern – Full Stack Developer</i>	Hyderabad, India July 2025 – September 2025
– Built and deployed production-grade frontend modules using Stencil.js, TypeScript, and ADP's internal frameworks. – Integrated and validated RESTful APIs for real-time, dynamic data flow. – Ensured component reliability through unit testing and contributed to agile sprint deliveries.	

PROJECTS

Wool Sector Management App – <i>woolmarketplace-4.onrender.com</i> <i>Sep – Oct 2024</i>	ReactJS, NodeJS, MongoDB
– Developed MERN stack solution for market tracking, traceability, and quality control in the wool industry. – Implemented scalable backend with Express.js and integrated MongoDB for data storage.	
SmartKitchen – <i>SmartKitchen.git</i> <i>March 2025</i>	React Native, Expo, Gemini API
– Built a mobile app automating grocery list generation using AI-driven culinary insights. – Integrated Google Custom Search and Gemini APIs for smart recipe and image retrieval.	
HealthGenius <i>Nov – Dec 2023</i>	React.js, Node.js, MongoDB
– Created a digital health platform with personalized tracking, remote monitoring, and secure data storage.	
Cold Email Generator – <i>ColdEmailGenerator.git</i> <i>Nov – Dec 2025</i>	Python, LangChain, LLaMA-3
– Built an AI tool to extract job requirements from career pages and generate personalized cold emails automatically. – Used LangChain + LLaMA-3 for structured job data extraction and email generation. – Applied ChromaDB semantic search to match job skills with relevant portfolio projects.	

SKILLS

Languages: C++, JavaScript, TypeScript, Python, HTML, CSS, Java (Basic)

Frameworks & Technologies: React.js, React Native, Stencil.js, Node.js, Express.js, Bootstrap, RESTful APIs, LangChain, Streamlit, Prompt Engineering, LLM Pipelines, Vector Databases (ChromaDB)

Tools & Platforms: Git, GitHub, Bitbucket, SourceTree, Jira, VS Code, Google Colab, Groq API

Databases: MongoDB, MySQL

Soft Skills: Communication, Problem-solving, Agile collaboration, Team leadership

CERTIFICATIONS & ACHIEVEMENTS

- Ranked in the Top 5% globally on LeetCode Contests with a rating of 1897 - leetcode.com/anushka0609/
- Ranked 18th at Engineering Project Showcase 2024, Bennett University
- Data Structures – Coursera
- Algorithmic Toolbox – Coursera
