

Mohammad Faizan Siddiqui

B.Tech Computer Science Engineering
Bennett University

siddiqui.faizanji@gmail.com — +91 8009020915 — GitHub — LinkedIn — LeetCode

Summary

AI enthusiast and third-year Computer Science Engineering student with hands-on experience in building full-stack applications integrated with AI models. Actively solved **350+ Data Structures and Algorithms problems on LeetCode**. Selected in internal rounds of **Smart India Hackathon (SIH)** and participated in multiple college-level hackathons. Strong interest in scalable AI-driven systems using React, Node.js, and Python-based backends, focused on real-world problem solving.

Technical Skills

- **Programming Languages:** C++, Python, Java, JavaScript
- **Web Development:** HTML, CSS, JavaScript, React, Node.js, Express
- **AI / ML:** Machine Learning, Deep Learning, CNNs, NLP, TensorFlow, Keras, PyTorch
- **Libraries & Tools:** NumPy, Pandas, OpenCV, Scikit-learn, Git, GitHub
- **Databases:** MySQL, MongoDB
- **Problem Solving:** Data Structures & Algorithms (350+ problems solved)
- **Soft Skills:** Clear communication, analytical thinking, problem-solving mindset, teamwork

Certifications

Neural Networks and Deep Learning — DeepLearning.AI (Coursera)
Score: **95.18%**

Projects

Smart PDF Analysis Platform (AI Student Helper)

GitHub

- Built an AI-powered platform for uploading PDFs and interacting through a chatbot-based Q&A system.
- Implemented document understanding, contextual question answering, and AI-generated quiz functionality.
- Developed during hackathon-based problem-solving environments, focusing on rapid prototyping and scalability.

Sahara – AI Voice Assistant for Elderly Care

GitHub

- Developed an AI-driven voice assistant to assist elderly users with reminders, scheduling, and daily tasks.
- Integrated speech recognition and AI-based intent extraction for natural language interactions.
- Designed the system to support real-time alerts and scalable smart monitoring integrations.

E-Commerce Web Application with AI-based Review Analysis

GitHub

- Built a full-stack e-commerce platform with product listings, cart functionality, and user interactions.
- Integrated sentiment analysis to classify and analyze user product reviews using AI models.
- Focused on clean UI design, modular backend structure, and future scalability.

Education

Bennett University, Greater Noida, UP
B.Tech in Computer Science Engineering
CGPA: **9.0**

2023 – 2027

St. Francis' College (ICSE), Lucknow
Class XII: **94.5%**
Class X: **89.9%**

2023
2021
