

Education

Bennett University(The Times Group)

Sep 2022 – Sep 2026

BTech Computer Science and Engineering, CGPA:7.78

Greater Noida

- Enthusiastic Data Science student with expertise in data analysis machine learning. Skilled in SQL, Python and Excel,with hands-on experience transforming large datasets into actionable insights.

Skills

Databases:MySQL, MongoDB, ERPNext (Frappe)

Software/Tools: MS Excel (Advanced), Power BI, Google App Script, Notion, Jira, Git, GitHub, VBA, VS Code, Tableau

Programming Languages: SQL, Python for Data Science

Technical Skills: Machine Learning, n8n, Data Visualization, Streamlit, OpenAI, Statistical Analysis

Libraries: Scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib

Work Experience

Biosarthi(Electricity Bill Automation)

June 2025 - July 2025

Data & Automation Intern

- Designed and deployed a fully automated data pipeline using **n8n**, **PDF.co**, and **OpenRouter (GPT-4)** to extract insights from electricity bills (PDF, Excel, images), boosting processing efficiency by 80%.
- Coordinated with internal teams to align **ERPNext automation** with operational requirements, ensuring smooth adoption across departments.

Fiernynet Technology LLP

August 2025

Data Science Intern

- Worked on **data preprocessing, model building, and visualization** for business problem-solving, improving the clarity and usability of datasets.
- Applied **machine learning techniques** to analyze trends and generate actionable insights, contributing to ongoing projects.

Projects

Cypher Securities Project Preview

Python, Cryptography, Jira

- Engineered a user-friendly GUI encryption tool that incorporated AES and RSA algorithms, enhancing data protection for over 200 files during transfers while streamlining the security process for users.
- Integrated file encryption, ensuring the confidentiality of sensitive information during file transfers.
- Initiated a robust key generation system, facilitating secure message exchanges for over 100+ transactions.

Breast Cancer Prediction using SVM Project Preview

Python, Scikit-learn, Pandas

- Developed a machine learning model using Support Vector Machine (SVM) with 95% accuracy to predict breast cancer.
- Performed data preprocessing, feature scaling, and model evaluation using cross-validation techniques.
- Visualized model performance with Matplotlib to interpret key metrics like precision and recall.

LinkedIn Job Posting Analysis Dashboard GitHub | Live Demo

Python, Pandas, Streamlit, Seaborn

- Developed an interactive **Streamlit dashboard** to analyze 1000+ LinkedIn job postings for Data Analyst and Data Scientist roles, enabling real-time market insights.
- Deployed on **Streamlit Cloud**, ensuring public access and improving data-driven decision-making for stakeholders.

Achievements and Certificates

Certification in *Excel Basics for Data Analysis* by - [IBM](#)

Certification in *Databases and SQL for Data Science with Python* by - [IBM](#)

Certification in *Australia Data Analytics Job Simulation on Forage* by - [Deloitte](#)

Certification in *Exploratory Data Analysis for Machine Learning* by - [IBM](#)
