SUMMARY

Software Engineering and AI undergraduate with strong foundations in DSA, backend development, distributed systems, and real-time data processing. Experienced in building scalable APIs, microservices, and ML-powered systems with Python, C++, and modern backend frameworks. Skilled in problem-solving, systems thinking, and cross-functional collaboration — aligned with high-performance engineering roles at global tech companies like project44.

SKILLS

Languages: Python, C++, Java, JavaScript, SQL

Backend & Systems: FastAPI, Flask, Node.js, REST APIs, Microservices, Linux, Docker

Distributed Systems & Data: Streaming Pipelines, Real-time Data Processing, Caching, Scalability Patterns

AI/ML: TensorFlow, PyTorch, scikit-learn, NLP, Computer Vision, Model Deployment

Cloud & DevOps: Google Cloud, Firebase, AWS (basic), Git/GitHub, CI/CD

Databases: MySQL, Firebase Firestore, SQLite

Core CS Concepts: DSA, OOP, OS, DBMS, Networking, System Design (Foundational)

EDUCATION

Bennett University , Greater Noida, India	<i>Sept 2022 – Sept 2026</i>
B.Tech in Artificial Intelligence and Machine Learning	CGPA: 8.90/10

WORK EXPERIENCE

AI Specialist Intern – Quant Global	<i>Oct 2025</i>
- Built scalable data pipelines for high-frequency financial streams, ensuring low-latency processing and reliability. - Applied ML and statistical modeling for predictive insights, anomaly detection, and risk intelligence. - Developed modular Python workflows aligned with distributed system design and production deployment.	
SDE Intern – Frugal Testing	<i>Apr 2025 – Jul 2025</i>
- Automated workflows using Python and Selenium, minimizing manual effort and enhancing system reliability. - Built interactive dashboards for competitor and market analysis, improving reporting efficiency by 35%. - Collaborated with engineers to refine code efficiency and long-term maintainability.	

PROJECTS

BrandAudit – Real-time Sentiment Dashboard	<i>Oct 2025</i>
GitHub - Full-stack (MERN) dashboard using Flask, React.js, and VADER NLP for real-time sentiment analysis across social media. - Analyzed 10K+ posts and visualized insights using Chart.js and automated reports.	
Vaani – Indian Sign Language Platform	<i>Oct 2024</i>
GitHub - Built an ISL translation platform using MediaPipe, TensorFlow, and OpenCV with 88% recognition accuracy. - Included SOS alerts, a learning module, and AI-powered gesture assistance.	
VASTU – E-commerce for Local Artisans	<i>Sept 2023</i>
GitHub - Marketplace platform supporting local artisans with AI-driven recommendation engine and NLP-powered product search. - Built with Flutter + Firebase, supporting secure payments, product discovery, and analytics.

RESEARCH PAPER

Modeling Dengue Fever Outbreaks Using Machine Learning
Published in *Lecture Notes in Networks and Systems (Springer Nature)*, SoCPaR 2023. Compared RF, KNN, LSTM, and LightGBM models for outbreak forecasting; LightGBM achieved 95.9% accuracy.
