Objective

B.Tech Computer Science student with practical experience in developing AI, design, and software solutions across diverse technology domains.

Experience

Web3Task (UX/UI Intern)

Jun 2025

Redesigned a website dashboard and landing page; created reusable design assets (components, posters) and branding for a new product.

Built responsive, modern UI and interactive dashboard layouts to improve navigation and engagement.

Collaborated with developers and product leads to align design with functionality and business goals.

AGIE.AI (AI Intern)

Jul 2024

Learned and applied **prompt engineering**, **LangChain** workflows, and **Groq's LLaMA 3** model to build conversational AI.

Created an AI assistant that evaluated prompt styles (formal vs casual), tracked **token usage**, and measured response latency (<50ms).

Education

B.Tech in Computer Science Engineering (CGPA: 8.8)

May 2026

Bennett University, Greater Noida

Key Skills

Programming: Python, C++ (OOP, Data Structures), Java, SQL, HTML/CSS

DevOps & Cloud: GitHub, Jenkins, Docker, AWS (EC2, S3, Lambda, CloudWatch), Jira

Design: Figma, Adobe XD, Canva | Wireframing, Prototyping, User Flows, Responsive Design, Usability Testing, Design Systems

AI/ML: CNN, ResNet50, SVM, Random Forest, NLP

GenAI: LangChain, LLaMA 3, Groq, Token Optimization

Key Projects

Cybershield [GenAI]

LangChain, Gemini, NLP, OCR

Developed a context-aware GenAI redaction pipeline to mask sensitive information across text, image, audio.

Performance in-par with existing models like Microsoft Presidio, etc. Achieved 95%+ contextual redaction accuracy in tests; enabled safer pre-/post-LLM data processing.

Brain Tumor Detection [CNN, NLP, ResNet50]

TensorFlow/Keras, EfficientNet, SVM, Random Forest, XGBoost

Benchmarked multiple classifiers on MRI scans for tumor detection.

Improved validation accuracy by 11% (from ~85% with SVM to ~96% with EfficientNet).

AniZone – UX/Product Design

Figma, HTML/CSS

Designed an integrated platform for anime streaming, watch parties, and e-commerce.

Conducted user research, created wireframes, and usability testing for high-fidelity prototypes.

Paint Application (C++, Algorithms)

Desktop UI, Windows

Built a minimalistic paint application for Windows inspired by MS Paint.

Certifications

Foundations of UX Design (Google) — Nov 2024

Start the UX Process (Google) — Nov 2024

AWS Academy: Cloud Foundations & Essentials — Apr 2024

Positions of Responsibility

Co-Head, DevOps Club (2024); Head, AR/VR Club (2023); Student Representative, Industry Interaction (2023);

Member, Coding Society (2023) — Bennett University

Achievements & Extra-Curricular

Graphic Era Techsprint Hackathon — 10th position (2025)

Organized mentorship program for AR/VR enthusiasts (2023)

Basketball team player at SportiKon, Bennett University (2023)
