

LAKSHYA KUMAR RAI

📍 Greater Noida

☎ 6306981006 ✉ lakshyaxobvious@gmail.com

Summary

Presently, I am a B.Tech student of Computer Science Engineering at Bennett University (The Times Group), with strong expertise in backend development and intelligent workflow automation. I specialize in building scalable server-side architectures, integrating AI models via APIs (e.g., OpenAI, HuggingFace), and creating autonomous agents for business process automation. I actively develop no-code/low-code workflows using tools like n8n and Zapier and work on building custom automation SaaS tools. I'm passionate about using AI to solve real-world problems with measurable impact.

Experience

Strift

Head Backend developer

Greater Noida, Uttar Pradesh

- Worked as the Head Backend Developer for a startup project called Strift. Took full ownership of the server-side architecture and workflow automation. Integrated APIs (e.g., ZOD, Express.js, Axios) to automate internal data pipelines and built scalable backend systems using MongoDB. Also worked on AI-driven features such as:

Automating content analysis and ticketing using OpenAI

Setting up internal bots to handle FAQs and system notifications

Designing reusable automation templates for internal data sync and processing

Projects

AI Email Summarizer Agent: Built a workflow using OpenAI + n8n that parses incoming emails and summarizes them into actionable tasks in Notion.

LinkedIn Lead Extractor + CRM Automation: Used Puppeteer and Zapier to extract LinkedIn comments, find emails, and push data to Airtable with auto-personalized email drafts.

Sales Outreach Agent: Created a GPT-based agent that crafts emails and auto-schedules follow-ups with users via Gmail API.

Workflow Templates Store: Currently building a set of reusable workflow templates for sale on Gumroad and n8n Marketplace.

Skills

Backend Development Node.js JAVA JavaScript C++ Frontend Development SQL MongoDB React.js
Express.js Time Management skill keen learner proficient in English (both spoken & written) Adaptability Resilience
Problem Solving Accountability Reliability websockets git postman n8n web scraping AI SAAS DEV
AUTOMATION SCRIPTING
