

Mani Mehndiratta

mani.mehndiratta2705@gmail.com | +91 9810173363

[Github](#) | [LinkedIn](#)

Key Skills

Languages: Python, C++, SQL

Technologies & Tools: Azure, Power BI, Spark, Hadoop, Hive, MATLAB, Cisco (computer networking)

Machine Learning and Data Analysis: Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow, Keras, Deep Learning, Neural Networks

Education

Bennett University (Greater Noida, Uttar Pradesh)

Sep 2022 – May 2026

Bachelor of Technology in Computer Science Engineering

CGPA: 9.2 /10

Relevant Coursework: Object Oriented Programming, Database Management Systems, Discrete Mathematics, Digital Design, Microprocessors (Computer Architecture), Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Soft Computing, Data Mining, Big Data Analytics, Time Series Analysis, Deep Learning

Projects

Pinocchio's Nose / Python, TensorFlow, Keras, Streamlit, Google Speech API

April 2024

- Developed an online platform to detect AI-generated images and censor profane audio content, leveraging advanced machine learning and NLP techniques.
- Engineered and validated a CNN-based image detection model achieving 93.63% accuracy on a 100,000-image dataset.
- Implemented a profanity filter using Google's gTTS and Speech Recognition API.
- Streamlined user interaction through a visually intuitive interface built with Streamlit, supporting seamless image and audio analysis functionality.

Agro-Horti / Python, Scikit-Learn, Keras, React, JavaScript

September 2024 – October 2024

- Conducted comprehensive time series analysis on crop prices using a dataset of over 3 million entries, implementing SARIMAX and LSTM models for accurate price prediction.
- Designed a comparative analysis framework to evaluate model performance, achieving a training accuracy of 93.22% and a test accuracy of 93.44% in forecasting trends for 17 essential food commodities.
- Employed Python libraries such as Pandas, NumPy, and Scikit-Learn for data handling and preprocessing; used Keras for deep learning models.
- Devised an interactive web interface with React and JavaScript, providing clear visualizations and insights on crop pricing trends for end users.

EcoSync / Python, TensorFlow, React, Machine Learning

January 2025

- Developed a user-centric platform to optimize energy consumption for households and businesses using real-time data analytics and machine learning.
- Engineered a smart scheduling system that automates appliance usage during low-tariff periods, enhancing energy efficiency and cost savings.
- Implemented a concept of gamification i.e community power sharing to reduce grid dependency through local energy distribution.

Certificates

- Certificate of Appreciation, University Level Smart India Hackathon
- Developer Virtual Experience Program, Forage, Accenture
- Builders Online Series, AWS
- Data Structures, Coursera
- Big Data Analytics with PySpark, Infosys Springboard
- Simulation and Modeling of Natural Processes, Coursera
- Improving Deep Neural Networks, Coursera
- Supervised and Unsupervised Machine Learning, IBM (Coursera)
- Data Analysis and Visualization, IBM (Coursera)
- Introduction to Computers and Operating Systems, Microsoft (Coursera)
- The Bits and Bytes of Computer Networking, Google (Coursera)
- Foundations of Data, Google (Coursera)
