

MUSKAN BEHERA

(+91) 6304375072 | muskanbehera855@gmail.com | <https://github.com/Muskan0811>

Education

Bennett University (Times of India), Greater Noida, India
Bachelor of Technology in Computer Science and Engineering

Aug 2023 – May 2027
CGPA- 8.3

Skills and Technologies

Languages: C++ | Python | HTML | SQL

Frameworks/Technologies: Data Structures and Algorithms | Object-Oriented Programming | Databases | MySQL | Visual Studio | Power BI

Relevant Courses: Data Structures | Advanced Algorithms and Graphs | Operating Systems | Database Management Systems | Computer Networks

Projects

RAFTAAR – Smart Carpooling Web App

Developed a full-stack MERN application for real-time carpooling, integrating Google Maps API for live tracking and a parent monitoring view for safety. Implemented ride-matching logic based on routes and timings, and built a scalable backend with RESTful APIs. Focused on responsive UI/UX to deliver a seamless and secure commuting experience.

Credit Card Fraud Detection Web App

Built a fraud detection system using Python and Streamlit, achieving 99.8% accuracy on Kaggle data with Decision Trees and Random Forest. Applied SMOTE and scaling to handle class imbalance and improve performance. Designed an interactive dashboard for real-time transaction input and fraud visualization, demonstrating practical fintech security applications.

Banking App – Finance Management Dashboard

Created a full-stack fintech platform with Next.js, TypeScript, Appwrite, and Plaid/Dwolla APIs to enable account linking, secure fund transfers, and real-time transaction monitoring. Added features like authentication, transaction history filtering, and financial dashboards with charts for insights. Delivered a responsive UI to ensure a smooth cross-device user experience.

Fashion Recommendation Website (Ongoing – Cloud Deployment)

Designed an AI-powered fashion recommendation system using TensorFlow, Keras, and ResNet50 for feature extraction and nearest-neighbour search. Integrated with Streamlit to provide an intuitive interface for image-based recommendations. Currently deploying on Render Cloud to enhance scalability, accessibility, and end-user experience.

Experience

AI in Business World Internship

SEPR University, France (Dec 2024 – Feb 2025)

- Designed and implemented an intelligent chatbot to enhance user interaction and automate customer support tasks.
- Gained hands-on experience in applying artificial intelligence techniques to solve real-world business challenges.

Industrial Training Program (Data Science)

AMG Technologies LLP (Edu-Versity) (Nov 2024 – Jan 2025)

- Completed an online training program in Data Science, building a strong foundation in analytical skills, data-driven problem-solving, and the use of industry-relevant tools and techniques.
- Acquired theoretical and practical knowledge of key Data Science concepts through interactive sessions and assignments.

Junior Content Writer

IEEE, Bennett University (Oct 2023– Dec 2024)

- Authored and curated content for events, publications, and social media to promote technical topics and boost community engagement.
- Produced educational articles and social media posts on blockchain technology, increasing awareness and student participation.

Education and Professional Development

- Data Structures** – Coursera.org
- Database Management Systems** – Coursera.org
- Data Analysis** – Infosys Springboard
