Professional Summary

Motivated and detail-oriented Computer Science (AI) undergraduate with hands-on experience in Machine Learning, Deep Learning, and full-stack development. Skilled in Python, C++, and AI frameworks, with a proven track record of delivering real-world projects including brain tumor detection and drowsiness monitoring. Adept at fast learning, research, and collaboration in both individual and team environments.

Skills

- Programming Languages: Python, C++, JavaScript, HTML, CSS, Java
- Frameworks & Tools: TensorFlow, Keras, OpenCV, Scikit-learn, Bootstrap
- Core Areas: Artificial Intelligence, Machine Learning, Deep Learning, Natural Language Processing, Data Analysis, generative Ai,

Education

B.Tech in Computer Science (AI)
Bennett University, Noida, UP
Sep 2022 – Present

- CGPA: 8.07 (4th Sem SGPA: 8.82 | 5th Sem SGPA: 8.27 | 6th Sem 8.32)

Senior High School – 89.67%
Dewan Public School, UP | Apr 2021 – May 2022

High School – 89.67%
Dewan Public School, UP | Apr 2019 – May 2020

Projects

- **Brain Tumor Detection (U-Net, Deep Learning)** – Identified tumor regions in MRI scans using a U-Net CNN architecture for medical image segmentation.
- **Drowsiness Detection System (ML/AI)** – Detected driver alertness levels in real time using facial landmarks, eye-tracking, and machine learning models.
- **Expense Tracker (Node.js, MongoDB, Express, React)** – Developed a full-stack web app to manage user finances, visualize spending trends, and provide analytics dashboards.
- **Search Info Tool (Python, Selenium)** – Automated web data extraction and information retrieval using Selenium and WebDriver for efficient data collection.
- **RPG Game (Java, OOP)** – Designed and implemented a 2D role-playing adventure game as part of a collaborative team project.
- **Malaria & Crop Prediction Models (Machine Learning)** – Built predictive models for malaria risk detection and crop yield forecasting using classification and regression algorithms.
- **Discord Chatbot (Python, APIs)** – Created an interactive Discord bot integrating multiple API keys for real-time data fetching and automated responses.
- **Image Analysis & Object Detection (Vision Transformer, YOLOv8)** – Implemented advanced computer vision techniques for image classification, feature extraction, and real-time object detection.

Certifications & Courses

Coursera (Stanford, Google, IBM, Alberta, UC San Diego):

- Improving Deep Neural Networks
- TensorFlow for AI, ML, and DL
- NLP with Classification & Vector Spaces
- Supervised & Unsupervised Machine Learning
- Algorithmic Toolbox
- Data Structures, Object-Oriented Design
- Computer Networking & Operating Systems

Additional Information

- Strong understanding of ML pipelines, CNNs, and dataset preprocessing.
- Open to research internships, AI/ML projects, and cross-functional tech roles.
