Internships and Experiences

Backend Developer

Rightchoice.ai, Gurgaon, Haryana, India

November 2025 – January 2026

- Engineered a full-stack web application using React, Node.js, and Python to streamline Google My Business profile and listing management for the operations team, improving workflow efficiency for GMB operations.
- Built and deployed independent Python scripts and REST APIs to integrate GMB REST API and Facebook Graph API with Rightchoice.ai's dashboard backend, enabling automated profile updates and data synchronization.
- Implemented MongoDB database architecture using PyMongo for efficient data storage, retrieval, and querying, ensuring seamless integration with the backend services.
- Collaborated in an agile environment with cross-functional teams, maintaining continuous communication with operations staff to rapidly identify and resolve product bugs using Git, GitHub, Trello, Slack, and Intercom.

Secretary

Financo Bennett University, Delhi, India

April 2023 – April 2024

- Co-founded Bennett University's finance and consulting club.
- Conducted news-based paper trading events in collaboration with StockGro, attracting 200+ participants.

PR and Outreach Head

Enactus Bennett University, Delhi, India

April 2023 – April 2024

- Led public relations and outreach campaigns for two social enterprise projects: Ki (biodegradable bamboo toothbrushes) and Nirvi (upcycled denim products) .
- Drove 1,000+ bamboo toothbrush sales and 50+ recycled tote bag sales in a single day through targeted customer engagement and strategic marketing initiatives.

Projects

Wary Inventory Management

Live-[Django, DRF, PostgreSQL, Bootstrap, Unicorn, WhiteNoise]

- Built a full-stack inventory management system with Django REST Framework and PostgreSQL, implementing 32 RESTful API endpoints across 3 core models and 4 responsive Bootstrap pages
- Engineered 4-category inventory tracking system (Raw Materials, WIP, Finished Goods, Consumables) with batch/lot tracking, expiry date management, and automated low-stock alerts.
- Developed transaction management modules for 4 stock operation types (In/Out/Adjustments/Transfers) with negative stock prevention and dashboard analytics.

OneMail

Github - [React.js, Node.js, IMAP, Elastic Search, Postgres, Prisma, Docker, Google Cloud, REST API, WebSocket Gemini API]

- Designed and deployed a unified mail aggregator platform with 43 RESTful API endpoints using React.js frontend and containerized Node.js backend with PostgreSQL and Prisma ORM.
- Implemented Google OAuth via Google Cloud Console to enable users to integrate multiple Gmail accounts into a unified inbox.
- Integrated IMAP protocol for real-time email synchronization with AI-powered categorization across 6 categories and auto-reply generation using Gemini API.
- Optimized email querying by implementing Elasticsearch indexing across 15 email fields and WebSocket connections for real-time mail delivery to frontend.

Technical Skills

- **Programming Languages:** JavaScript, TypeScript, Python, C++, HTML, CSS
- **Technologies and Tools:** GraphQL, REST API, React.js, Next.js, Django, WebSockets, Node.js, Express.js, Elasticsearch Data Structures and Algorithms, Machine Learning, VS Code, Docker, GitHub, Git
- **ML and Python Libraries:** Numpy, Pandas, sklearn, Seaborn, Matplotlib, Pytorch, TensorFlow
- **Database/State Management:** NoSQL, MySQL, PostgreSQL, MongoDB, Redis, Firebase, Prisma ORM, Redux, RTK Query, Zustand

Education

B.Tech, Computer Science Engineering

Bennett University, Greater Noida, Uttar Pradesh

2022-2026

CGPA: 7.89

- **Relevant Coursework:** Data Structures and Algorithms, Operating Systems, Database Management, Computer Networks, Software Engineering, Machine Learning
