Projects

Legal Track 4 — AI + Blockchain FIR Platform

[GitHub](#) | [Live](#) | [Demo](#)

- Engineered an AI-powered FIR system with ANN models for legal predictions, voice-to-text transcription, and blockchain-backed immutable FIR storage.
- Designed secure backend with IPFS + Flow Blockchain smart contracts ensuring tamper-proof legal records.
- Optimized user workflow, reducing FIR filing time by 60% compared to manual processes.
- **Tech Stack:** React 19, Next.js 15, Tailwind, ShadCN, Clerk, Node.js, Python (ANN Models), OpenRouter + Gemini APIs, IPFS (Pinata), Flow Blockchain.

Multiplayer Typing Game (Monkeytype Clone)

[GitHub](#) | [Demo](#)

- Developed a real-time competitive typing platform supporting live multiplayer races with WebSocket synchronization.
- Implemented efficient socket-based race logic, ensuring <50ms latency for smooth real-time updates.
- Architected responsive UI/UX with typing accuracy, WPM tracking, and live leaderboards.
- **Tech Stack:** TypeScript, Socket.IO, JavaScript, CSS.

VulnScanner — Automated Web Vulnerability Scanner

[GitHub](#)

- Built an automated security scanner using Python and Flask to audit web applications and detect vulnerabilities.
- Implements crawling, page discovery, form extraction, and directory brute-forcing to uncover hidden endpoints.
- Detects SQL Injection, XSS, CSRF issues, CORS misconfigurations, cookie weaknesses, and missing security headers.
- Generates professional PDF reports summarizing findings with color-coded severity and remediation steps.
- **Tech Stack:** Python, Flask, Requests, BeautifulSoup, ReportLab.

Achievements

- Winner, AI + Web3 Mini Hackathon — engineered scalable AI + blockchain app in <24 hours.
- Winner, Fluxor Flow Web3 Hackathon — built production-ready smart contract system.
- Top 10, NeonX Hackathon — among 400+ participants.
- 4th Place, Galactic Escape Hackathon — demonstrated problem-solving under time pressure.
- 7th Rank, ACM Chapter Coding Contest — tested advanced algorithmic skills.

Education

- B.Tech CSE, Bennett University — GPA: 9.04/10 (Ongoing)
- Class 12 (CBSE) — 76.5%
- Class 10 — 94.5%

Skills

- **Programming:** Python, C++, TypeScript, JavaScript
- **Web/Backend:** Node.js, Next.js, React, SQL, REST APIs
- **Cloud DevOps:** AWS, Docker, Git/GitHub, CI/CD (basic)
- **Core CS:** Data Structures

Algorithms, OOP, System Design (basic)

Certificates

- [Crash Course on Python — Coursera](#)
- [Data Structures — Coursera](#)
- [Algorithmic Toolbox — Coursera](#)
- [Docker for Beginners \(Hands-On\) — Coursera](#)
