

Peddinti Lalithaditya

Num: +91 8885333844 - [Gmail](#) - [Linkedin](#) - [Git](#)

EDUCATION

Bennett University
B-Tech, CSE- Cybersecurity
Aditya Collage
12th (BOIE)

India, Uttar Pradesh, Noida
3rd year - 5th Semester
India , Andhra Pradesh , KKD
2022-2023

TECHNICAL SKILLS

Programming Languages: Python, C++ , C, Java, Arduino Language

Libraries and Tools/Applications: PyTorch, Sklearn, Pandas, Numpy, OpenCV, Git, Kali Linux, Metasploit, Arduino, Raspberry pi

ML Architectures: BASIC's in CNN, YOLO, RandomForest

WORK EXPERIENCE

Intern

BSL Engineering Service Limited, Noida, India

June 1st - July 25th, 2025

- Gained hands-on exposure to **corporate IT and OT networks**, including office infrastructure, **SCADA systems**, **PLCs**, and **industrial automation environments**.
- Observed and learned **enterprise network design, access management, and security practices** implemented in large-scale IT and industrial setups.
- Developed an understanding of **IT-OT integration**, focusing on how industrial processes are monitored, managed, and secured for efficient operations.

PROJECTS

- **Keylogger (Cybersecurity — Python)** , Developed a Python-based keylogger to capture and log keystrokes for security monitoring and controlled-use scenarios.
- **STEALTHGEO (Cybersecurity — IP Geolocation)** , Built an IP-based geolocation tool to identify and analyze system locations using network data and tracking algorithms. .
- **Versa USB (Cybersecurity & Hardware — Arduino)** , Designed a Rubber Ducky–inspired USB attack tool using Arduino to automate system commands and security bypass demonstrations.
- **Watch – Advanced Safety & Cyber Surveillance (IoT — Raspberry Pi)** ,Developed a Raspberry Pi–based backend system for real-time audio, video, and location capture during emergency situations.
- **IDEAFORGE (Platform Development — Community & Collaboration)** , Co-developed a multi-portal platform combining community engagement, knowledge sharing, a project marketplace, and a coding workspace to enable mentorship, collaboration, and real-world project execution.

PUBLICATIONS

- **APMVU: Exploit Pentesting of User Account Settings with Arduino-Based Pro Micro USB and Microcontroller**
Accepted at ICICEC International Conference , IEEE (Accepted; To Be Published) [Check it here](#)

EXTRACURRICULAR ACTIVITIES

- Core Member of the **Cybersecurity Club (Ciphers)** in the first year; Stood as **Vice President** in the second year at **Bennett University**, contributing to technical initiatives and club leadership.
- Secured **79th rank out of 402 teams** in Bennett University's internal Smart India Hackathon by developing an **AI-powered chatbot** for the Department of Justice website within **2 days**, focusing on case tracking, lawyer search, and legal assistance (team-based project).
- Actively working on **Rubber Ducky Replication**, a cybersecurity and hardware-focused initiative under guidance from faculty and cybersecurity experts, aiming to enhance traditional payload execution through novel functionalities .

SKILLS & INTERESTS

- Strong communication and active listening skills; adaptable, approachable, and committed to work with proven leadership and teamwork abilities.
- Interests include fitness activities (gym), hands-on project development and research, music, and photography.
