EDUCATION

Bennett University, Greater Noida

Aug 2023 – May 2027

Bachelor of Technology in Computer Science Engineering (AI & Machine Learning)

CGPA: 8.0/10

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Neural Networks, DBMS, OOP (Java)

TECHNICAL SKILLS

- **Languages:** Python, C++, Java, JavaScript, SQL
- **AI/ML:** TensorFlow, PyTorch, Scikit-learn, Keras, NumPy, Pandas, Matplotlib, CNNs, RNNs, LSTM, BERT, GANs, VAE, Computer Vision, NLP, Model Optimization, Feature Engineering
- **Tools:** Google Cloud Platform (25+ badges), FastAPI, REST APIs, Git, GitHub, Docker, Linux

INTERNSHIP EXPERIENCE

Smartbridge | Generative AI Intern

June 2025 – July 2025

Remote

- Completed 60-hour intensive virtual internship on Generative AI and Google Cloud Platform technologies
- Developed production applications using **Google Gemini API** and **FastAPI** for scalable AI model deployment
- Built **multilingual chatbot** using BERT transformers and **wine quality predictor** with advanced ML algorithms
- Implemented **VAE, GAN, BERT, and LSTM** architectures for diverse generative AI applications
- Earned **25+ Google Cloud badges** and completed **33+ FutureSkills courses** in AI/ML and cloud computing

InternPro | AI/ML Intern

June 2025 – July 2025

Remote

- Developed AI/ML models for real-world business applications with focus on model training and optimization
- Contributed to IT operations including system troubleshooting and workflow automation
- Recognized for strong problem-solving, adaptability, and technical proficiency

PROJECTS

BiteWise – AI-Powered Food Recognition & Nutrition Analysis

Python, TensorFlow, CNNs

- Built food recognition system using **CNNs** to identify 100+ food items with high accuracy
- Implemented computer vision techniques for portion size estimation and nutritional value calculation
- Integrated nutritional database API providing comprehensive macronutrient analysis for diet evaluation
- Optimized model performance using transfer learning, data augmentation, and quantization techniques

HandWritten Text Recognition System

Python, TensorFlow, RNN-LSTM, OCR

- Developed handwritten text recognition using **RNN-LSTM** architecture with high character-level accuracy
- Engineered preprocessing pipeline with noise reduction, binarization, skew correction, and normalization
- Implemented **CTC loss function** for accurate sequence-to-sequence learning without forced alignment
- Fine-tuned hyperparameters achieving 15% error rate reduction through cross-validation and grid search

CERTIFICATIONS & ACHIEVEMENTS

- **25+ Google Cloud Platform Skill Badges** – Expertise in cloud services, ML APIs, and infrastructure
- **Programming in C++ : A Hands-on Introduction Specialization** – Coursera
- **Machine Learning: Regression** – University of Washington (Coursera)
- **Object-Oriented Data Structures in C++** – University of Illinois (Coursera)
- **Object-Oriented C++ : Inheritance and Encapsulation** – Coursera
