prakharswaroop2023@gmail.com

SUMMARY

CS student with a strong foundation in Data Structures and Algorithms using C++, and experience building AI/ML solutions with Python. Proficient in developing full-stack applications with Flask and SQLite, with additional background in Java. Focused on writing efficient, well-structured code to solve complex engineering problems.

EDUCATION

**Bachelor of Technology(Computer Science),
Bennett University**

CGPA- 8.71
Third year

Expected 2027

IIT Madras(Diploma in Programming)

Expected 2026

SKILLS

Programming and Fundamentals

C++, Python, Java, Data Structures & Algorithms, OOPS

Data Preprocessing and Machine Learning

Scikit-Learn, Matplotlib, Pandas, Numpy, TensorFlow

Development

Flask, Jinja2, PostGreSQL, SQLite Database,
SQLAlchemy

PROJECTS

QuizMaster

A Flask-Python, Jinja based MVC web app which enabled users to take subject-wise quizzes designed by an admin who has authority to edit, delete and create the quizzes

Sales Prediction

A Model that estimate the item outlet sales using Random Forest Regression based on input features like item_type, item_weight, etc.

Adversarial Shield

A Deep learning based system to detect adversarial attacks on images. Built using a CNN model trained to distinguish between clean and adversarial images

EXTRA-CURRICULAR ACTIVITIES

- Participated in Hackaccino 3.0 Hackathon at Bennett University and built Adversarial Shield
- Took part as the delegate of U.A.E within the UNHRC committee in Model United Nations
