PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building **enterprise-grade dashboards, AI-powered tools, and backend systems**. Proven ability to work across **frontend, backend, databases, and infrastructure**, with exposure to AI-driven products and strong communication skills for collaborating with technical and non-technical stakeholders.

EXPERIENCE

Junior Full-Stack Developer (Full-Time)

Jul 2025 – Present

SpectroNOVA — Enterprise Product Company (Remote)

- Developed and maintained **6+ enterprise modules** using Vue.js, Nuxt.js, TypeScript, and ASP.NET, supporting **1,000+ users**
- Built **data-heavy dashboards** used by leadership to monitor system usage, workflows, and operational metrics
- Improved frontend load time by **40%** through component optimization, lazy loading, and bundle reduction
- Worked extensively with **backend APIs, relational databases, and role-based access control systems**
- Refactored **10+ legacy .NET services**, reducing production issues by **20%**
- Collaborated closely with product managers and stakeholders to translate business requirements into scalable technical solutions
- Actively reviewed and merged **50+ pull requests**, ensuring code clarity, maintainability, and reliability

Full-Stack Developer (Contract)

Aug 2025 – Oct 2025

USUALS.AI — AI Video Editing Startup (Remote)

- Built an **AI-powered video editing application** using Electron.js and React, working alongside AI-driven workflows
- Developed a web-based demo platform for **investor presentations and early enterprise users**
- Integrated frontend interfaces with AI inference pipelines and backend services
- Gained hands-on exposure to deploying, testing, and iterating on AI and non-AI product components

CS / IT Engineer Intern

Jun 2025 – Jul 2025

Bharat Heavy Electricals Limited (BHEL), Bhopal

- Worked with large-scale enterprise IT systems supporting **1,000+ employees**
- Analyzed **infrastructure performance, network latency, and server reliability**
- Studied **backup strategies, disaster recovery, and fault-tolerant architectures**
- Assisted in reviewing **DBMS workflows and system design** for government-scale applications
- Interacted with cross-functional teams, strengthening professional communication and documentation skills

EDUCATION

Bennett University

Aug 2023 – May 2027

B.Tech. in Computer Science Engineering (Cloud Computing) — Expected May 2027

TECHNICAL SKILLS

Languages: TypeScript, Python, C++, C#

Frontend: React, Next.js, Vue.js, Nuxt.js, Dashboard Design

Backend: Node.js, Express, ASP.NET, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud / Infra: AWS (EC2, S3), Docker, CI/CD, Git

AI Exposure: AI-powered applications, inference-driven workflows, data pipelines

Core CS: Data Structures, Algorithms, DBMS, System Design

PROJECTS

Quant Pilot — Decentralized Trading Platform in progress

- Built a data-intensive trading platform using Solana Anchor with wallet-based execution
- Integrated **real-time pricing and benchmarking data** from Pyth Network and Yahoo Finance
- Designed analytics views to help users understand portfolio behavior and risk exposure

Virtual Ventures — Trading Simulator 2024

- Built a real-time trading simulator supporting **1,000+ market symbols**
- Designed **interactive dashboards** for portfolio tracking and decision-making insights
- Implemented secure authentication, MFA, and backend data validation pipelines
