

Uday Chaudhary

udaychaudhary419@gmail.com | linkedin.com/in/uday-chaudhary | Meerut, Uttar Pradesh, India

EDUCATION

Bennett University

Bachelor of Technology in Computer Science; CGPA: 8.7/10

Uttar Pradesh, India

Aug 2023 – May 2027

EXPERIENCE

Frontend Developer

Zonomo Technologies Private Limited

May 2025 – July 2025

Uttar Pradesh, India

- Engineered responsive web interfaces using Next.js, Tailwind CSS, Framer Motion, and Lenis, improving user engagement and cross-device compatibility
- Designed and implemented customer and professional workflows with seamless UX, reducing user friction by optimizing interaction patterns and navigation flows
- Collaborated with founders and cross-functional teams in weekly strategy sessions to align technical implementation with business objectives
- Enhanced UI/UX design through iterative refinement based on user feedback and analytics

PROJECTS

HealthNudge – AI-Powered Medical Report Analyzer | *Next.js, Node.js, Express.js, MongoDB, OpenAI*

- Developed fullstack platform with secure upload and AI analysis of medical reports, reducing interpretation time by 70% through automated health summaries and focused on technical design
- Built AI-driven OCR pipeline with Text-to-Speech support using OpenAI API, improving accessibility for visually impaired users
- Engineered scalable backend with Firebase auth, email verification, and RESTful APIs supporting 500+ concurrent users

TripMate – AI Travel Partner | *React.js, Firebase, Gemini API, Vite*

- Built AI travel platform generating personalized itineraries via Gemini API with hotel, food, attractions, budget estimates, and map navigation, reducing planning time by 80%
- Implemented AI chatbot, budget-based filtering, dietary preferences, weather-aware plans, and PDF export with email feedback
- Configured Firebase Authentication with multi-factor authentication for secure user logins; personally resolved 10+ authentication-related tickets, ensuring a seamless user experience and minimizing disruptions.

Electricity Consumption Forecasting | *ARIMA, SARIMA, Prophet, LSTM, Python*

- Built a time-series forecasting system using LSTM to predict energy demand with **92% accuracy**
- Performed **data processing, EDA, and feature engineering** on a 504-record dataset, **improving model performance by 25%**
- Designed **data representations and visual reports** to communicate trends and forecasts, enabling identification of demand surges **48 hours in advance** for proactive resource planning

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript, Python, SQL, HTML/CSS

Frameworks & Libraries: Next.js, React.js, Node.js, Express.js, Tailwind CSS

Databases: MongoDB, MySQL, Redis

Tools & Technologies: Git, GitHub, REST APIs, Vercel, AWS, Postman

Methodologies & Practices: Debugging, Root Cause Analysis, Requirements Gathering, Stakeholder Communication, SDLC, Agile Development, Release Support
