Professional Experience

Data Science Intern

Feb 2025 - Jul 2025

Coratia Technologies (Remote)

Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Jupyter Notebook

- Built end-to-end data analysis and machine learning pipelines on real-world datasets, including data cleaning, exploratory data analysis (EDA), and feature preparation.
- Implemented predictive models and data visualizations to identify trends and generate actionable insights for business decision-making.

Bussiness Development Intern

Sept 2025 - present

CodeYoung(Bengaluru)

Tech stack: Excel, Google Sheets, CRM Tools, Data Analysis, Reporting, Market Research

- Analyzed international sales leads, customer interaction data, and conversion patterns to identify high-performing regions and outreach strategies.
- Built structured reports and dashboards to track outreach performance, response rates, and customer engagement, supporting data-driven sales decisions.

Key Projects

Insightify Churn Prediction App: AI-Powered Customer Intelligence Hub [\[Github\]](#) Mar 2025 - Jul 2025

Python, Pandas, NumPy, Scikit-learn, Flask, Gemini API, HTML, CSS, Render, GitHub —[Live Demo](#)

- Built and deployed an end-to-end churn prediction web application to visualize key customer and business metrics.
- Implemented a Scikit-learn-based classification model and integrated the Gemini API to generate AI-driven customer retention strategies.

E-commerce Sales Insight: [Amazon Sales Analysis with Power BI] [\[GitHub\]](#)

Aug 2025 - Sep 2025

Power BI, DAX, Excel, Data Cleaning, Data Modeling, KPI Analysis

- Built an **interactive Power BI dashboard** to analyze **Amazon sales performance, revenue trends, and customer behavior**.
- Performed **data cleaning, transformation, and KPI modeling** to generate **actionable visual reports** for business decision-making.

JourneyBook:[A travel diary to document and relive your adventures] [\[GitHub\]](#)

Apr 2025 - Jun 2025

Python, HTML, CSS, JavaScript, Google Maps API, OpenWeather API

- Built a **full-stack travel diary application** using **Python, HTML, CSS, and JavaScript** to allow users to document and revisit travel experiences.
- Implemented **real-time weather updates** via **OpenWeather API** and **map-based location features** using **Google Maps API** to assist travelers.

Technical Skills

Programming: Python, C++

Backend/APIs: FastAPI, REST API, OpenRouter, Groq, Google Workspace APIs, REST APIs

Databases: MongoDB, MySQL

AI/ML Frameworks: TensorFlow, Keras, LangChain, LangGraph, Scikit learn, Pandas, NumPy, Model Fine-Tuning, Classification, Regression, LangGraph, Agentic AI, Deep Learning

Generative AI: LLMs(GPT, BERT, T5)

Analytics/Visualizations And Cloud Power BI, Excel, AWS, Azure ML, Github Actions, Firebase

Tools: Git, GitHub, Streamlit, Jupyter Notebook

Education

B.Tech., Computer Science Engineering (AI & Data Science)

CGPA: 8.03/10.00

Bennett University, Greater Noida

09/2022 – 05/2026

Certifications/Achievements

- **PATENTS AND PUBLICATIONS:** Transforming Truth: Transformer-Based Models for Fake Data Detection on the Web. Conference: ICICCT-2024 [\[View\]](#)
- **Certifications:** [Supervised Machine Learning: Regression](#), [Supervised Machine Learning: Classification](#), [Object-Oriented Data Structures in C++](#), [Algorithmic Toolbox](#)
