SUMMARY

Detail-oriented Software Engineer and Project Assistant with expertise in building scalable applications using React.js, Node.js, and MongoDB. Adept at managing the full project lifecycle, from designing secure RESTful APIs to architecting solutions for national-level hackathons. Strong background in JavaScript and version control, with a focus on delivering stable, bug-free code within collaborative, fast-paced team environments. Committed to improving application performance and streamlining technical documentation

EXPERIENCE

Open Source Contributor

GirlScript Summer Of Code

Jun '25 — Oct '25

- Implemented new React.js features across 3+ projects and delivered 5 merged pull requests to improve UI functionality.
- Resolved bugs and patched code in Node.js/Express backends to enhance application stability and reduce error rates.
- Optimized data flows with MongoDB queries and schema updates to improve performance and maintainability.

PROJECTS

Accessibility Analyzer [Link](#)

- Engineered a full-stack MERN application to provide developers with real-time accessibility feedback, featuring a core analysis engine to detect 15+ common compliance violations
- Implemented a secure RESTful API with JWT-based user authentication and authorization to protect user data and session information.
- Designed and developed a responsive user dashboard with React.js, creating an intuitive UI/UX for seamless navigation and clear presentation of analysis results.
- Tech Stack: ReactJS, NodeJS, ExpressJS, MongoDB, JSON Web Tokens (JWT)

BookBnb [Link](#)

- Developed a scalable and maintainable server-side application by implementing the MVC (Model-View Controller) design pattern, which separated concerns and simplified future feature development
- Integrated the Leaflet.js API to display dynamic, interactive maps of campground locations, enhancing the user's discovery experience.
- Engineered secure user authentication and session management from scratch, including password hashing and validation middleware to protect user accounts.
- Tech Stack: JavaScript, EJS, MongoDB, NodeJs, ExpressJs

EDUCATION

B.Tech (Computer Science & Engineering) in Computer Science & Engineering, Bennett University, Greater Noida (GPA: 8.41)

Sep '23 — Present
Greater Noida, India

ACHIEVEMENTS & HACKATHONS

Smart India Hackathon (SIH) 2025

Government of India

Sep '25

Achieved a rank of 192 out of 400+ competing teams in India's largest national-level hackathon in the campus. Architected and developed a full-stack web application to solve a problem statement from the Ministry of Jammu & Kashmir regarding Mental health and Psychological Support. Collaborated in a team of 6 to design, prototype, and pitch a complete software solution within a 36-hour timeframe.

SKILLS

Languages JavaScript, Java, C++

Frameworks & Libraries Node.js, Express.js, React.js

Databases MongoDB, MySQL, PostgreSQL

Tools & Platforms Git, GitHub, Linux, VS Code

Concepts & Practices Data Structures, Algorithms, REST APIs, JWT (Authentication)

CERTIFICATIONS

[Operating Systems and You: Becoming a Power User](#), Google

Apr '25

[Fundamentals of Network Communication](#), University of Colorado

Apr '25

[Introduction to Cybersecurity Tools & Cyberattacks](#), IBM

Apr '25
