SUMMARY

Computer Science undergraduate specializing in frontend and full-stack development, with experience building responsive web applications and AI-powered systems. Developed projects using React, Node.js, MongoDB, Flask, and TensorFlow, with a focus on clean architecture, reusable components, and measurable performance improvements. Published contributor in health informatics research applying machine learning to medical diagnostics.

EDUCATION

Bennett University

B.Tech. in Computer Science, Artificial Intelligence

SGPA: 9.31/10; Cumulative GPA: 8.45/10.0; Recipient of Merit-Based Scholarship

Greater Noida, INDIA

August 2022 – Present

TECHNICAL SKILLS

Programming Languages: Python, C++

Backend & APIs: Node.js, Express.js, Flask, RESTful APIs

Databases: MongoDB, MySQL, SQL

Frontend: HTML, CSS, JavaScript, Bootstrap, Flexbox, CSS Grid

AI / ML: Supervised Learning, Neural Networks, Deep Learning

Data Tools: Pandas, NumPy, Jupyter Notebooks

Developer Tools: Git, GitHub, Linux Terminal, VS Code

PROJECTS

IntelliScan Diagnostics

Aug 2025 – Dec 2025

AI-Powered Diagnostic Tool

Python, TensorFlow, Flask

- Designed and trained a TensorFlow-based diagnostic model for structured patient input, reducing symptom evaluation time by 40%
- Improved diagnostic accuracy by 30% through feature engineering and supervised learning techniques
- Developed a Flask-based web interface achieving 90% positive user feedback in usability surveys

Property Rental & Booking Platform

Oct 2024 – Feb 2025

Full-Stack Web Application

MongoDB, Express.js, React, Node.js

- Built a full-stack rental platform with user authentication, property listings, and booking workflows
- Designed RESTful APIs using Node.js and Express following MVC architecture
- Implemented JWT-based authentication and role-based access control
- Modeled application data using MongoDB and Mongoose with schema validation

Stock Trading Platform UI Simulation

Aug 2024 – Sep 2024

Frontend Web Development Project

HTML, CSS, JavaScript

- Developed a responsive trading platform UI to simulate real-world fintech dashboards and workflows
- Implemented reusable UI components and custom navigation flows using modular CSS
- Handled dynamic UI interactions using vanilla JavaScript

Netflix Landing Page UI

Jan 2024 – Feb 2024

Front-End UI Project

HTML, CSS

- Recreated the Netflix landing page with pixel-accurate layout using HTML and CSS
- Applied Flexbox and CSS Grid to ensure responsiveness across devices

PUBLICATIONS

Advances in Brain Tumor Detection: Role of Feature Extraction and Machine Learning

Jan 2025

Contributed Chapter in Health Informatics Book

edbk – PBHE066_ch0002

- Contributed a chapter on the application of machine learning and feature extraction techniques for brain tumor detection.
- Discussed advancements in medical imaging, AI-driven diagnostics, and their impact on healthcare informatics.
- Chapter submitted and completed as part of the book publication process.
