leetcode.com/u/anshikag266/

Goal

B.Tech CSE student experienced in AI/ML and deep learning, full-stack development (PERN), computer vision (YOLO), and core CS fundamentals like System Design, OS, CN, and DSA, with interest in Cybersecurity. Strong problem-solving skills with hands-on research experience, including an IEEE-published deepfake detection model and eager to contribute to impactful software engineering projects.

Education

Bennett University (TIMES OF INDIA GROUP), BTech in Computer Science

2022-2026

Table 1: Academic Performance

Year	Odd-Sem	Even-Sem	CGPA
1st Year	9.31	9.75	9.59
2nd Year	9.61	10	9.7
3rd Year	9.64	8.89	9.58

Coursework: Cloud Computing, Design and Analysis of Algorithms, Operating Systems, Data Structures in C++ , Modern Cryptography, DevOps, UI/UX, User Center Design.

ACADEMIC BACKGROUND-CBSE BOARD

Table 2: School Academic Performance

Class	Year of Passing	Percentage
10th	2020	95.6%
12th	2022	84.6%

Projects

1.Quick AI

QuickAi.com

- Create amazing content with AI tools. Transform your content creation with the suite of premium AI tools. Write articles, generate images, and enhance your workflow.
- It was inspired by the tremendous wave of AI approaching in the fields of innovation and technology that helps us to build easily and make it easy for users to use the application and tools.Created using PERN stack.

2.Deepfake detection

Github.deepfake-detection

- Detects fake images generated using various technological tools. A new hybrid model that can accurately predict whether images are real or fake, outperforming other models in terms of accuracy.
- A research paper is written and published under IEEE on the above model named "Improving deep-fake detection using Hybrid model"

3.CPU-Scheduling

Github.CPU-Scheduling

- An implementation of various CPU scheduling algorithms in C++ . The algorithms included are First Come First Serve (FCFS), Round Robin (RR), Shortest Process Next (SPN), Shortest Remaining Time (SRT), Highest Response Ratio Next (HRRN), Feedback (FB) and Aging.
- It was inspired by my learning from the subject Operating System and was helpful for having a hand-on

experience and understand the importance of the subject.

4.Trend Bytes

Github.Trend-Bytes

- "Trend Bytes" is a subscription-based magazine reading application that offers users unlimited access to a wide range of magazines across various categories, including Business, Entertainment, Sports, Lifestyle, Politics, and Fashion. The application is designed for multi-platform accessibility, allowing users to read, browse, and customize their reading experiences. Key features include task scheduling, coupon redemption, and content categorization.
- It is a responsive design prototype created in Figma, inspired by learning on the subject of user-centered design and UI/UX.

Technical Skills and Hobbies

Core CS Concepts: System Design, DBMS, OOPS, Data Structure and Algorithms, Operating System, Computer Networks, Computer Vision, Figma, PERN stack

Programming Languages: C++ , Basic Python, SQL, HTML, CSS, JavaScript, Latex

Frameworks/Tools: Tensorflow, PyTorch, Keras, Torch, React, Node.js, Express.js, PostgreSQL, YOLO, Figma, Git, AWS

Hobbies: Competitive Coding, Exploring New Technologies, Badminton, Music, Travel, UI/UX Designing

Publications

1. **IEEE Published Research Paper** 03/2025 - 11/2025

Publication Title: 2025 14th International Conference on System Modeling Advancement in Research Trends (SMART) Article Title: Improving deep-fake detection using a hybrid model.
eCF Paper Id: SMART2025-242

Achievements

2. **Merit Scholarship(For 8+SGPA)** 09/2022 - 12/2025
3. **Dean's List Award(For Academic Excellence)** semester 4, semester 5

Technical Certifications

1. **Computer Vision: YOLO Custom Object Detection with Colab GPU** 01-2022
Using YOLO framework to train and use a model for object detection.
2. **Convolutional Neural Networks** 02-2022
Gained hands-on experience building CNN architectures for image classification, object detection, and visual recognition tasks, with practical projects using deep learning frameworks.
3. **Amazon Web Services: Networking Basics** 02-2024
Learnt about various services provided by AWS and about AWS infrastructure in AWS Builders Online Series organised by Amazon.
4. **The Bits and Bytes of Computer Networking** 02-2024
This course is designed to provide a full overview of computer networking. Covered everything from the fundamentals of modern networking technologies and protocols to an overview of the cloud to practical applications and network troubleshooting.
5. **Introduction to Computers and Operating Systems and Security** 03-2024
Describe the basics of the cybersecurity landscape and various business computing environments.
